

# GP Travel Enterprise Release 10.2

Presentation

Aug 12, 2024

Dear clients and partners!

We are happy to announce Release 10.2 of GP Travel Enterprise that is aimed on further transition on new modern front end technology of all functionality of the system, as well as minor enhancements for usability and user experience. Additionally some changes in API were done.

For scheduling the delivery dates please contact our support team.

## Enhancements

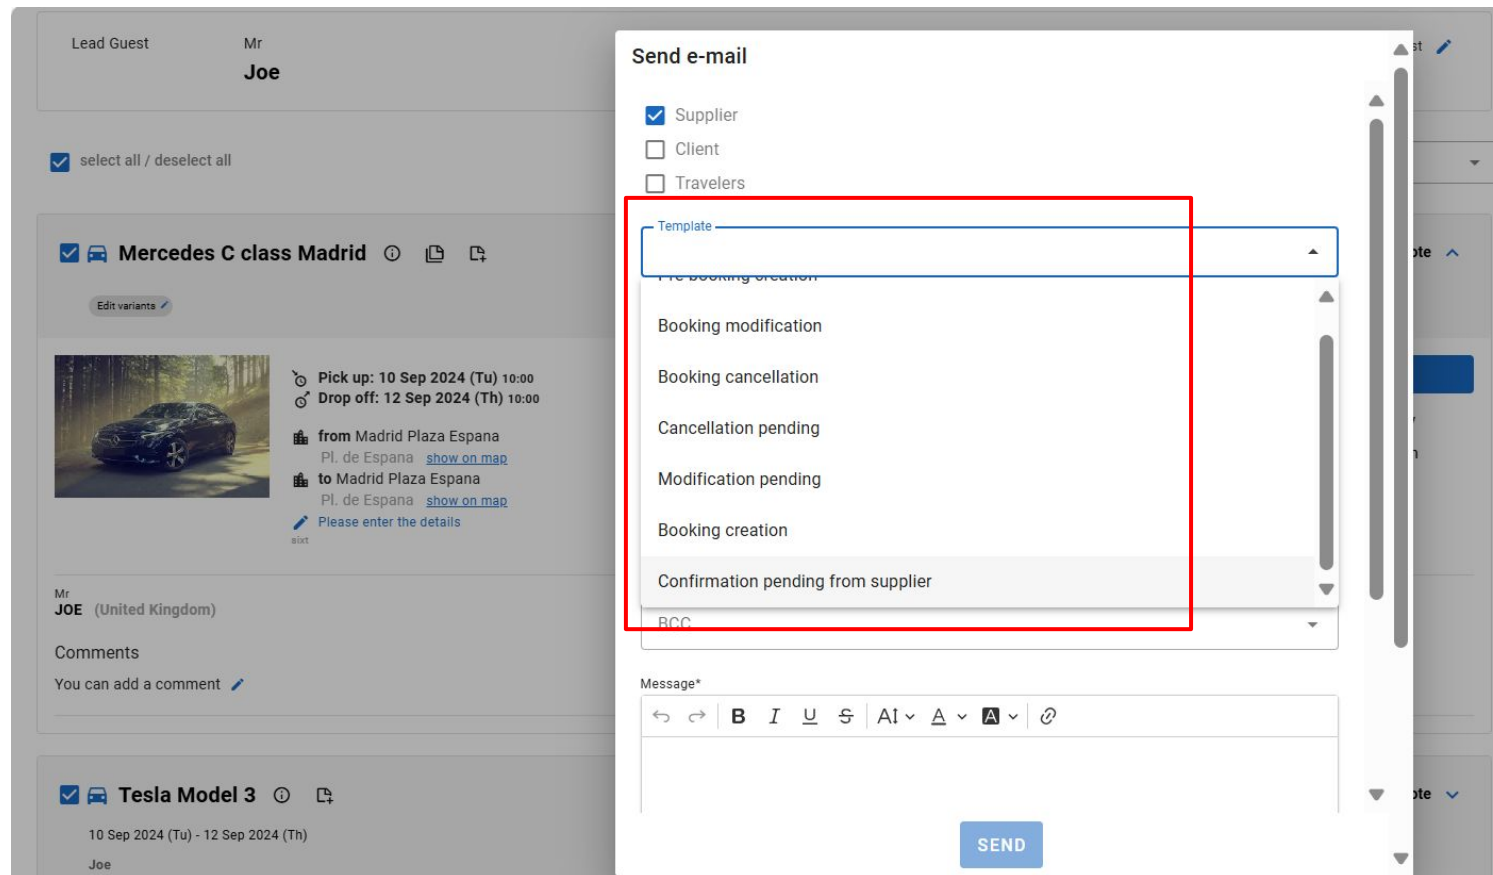

### New Capabilities:

- ✓ E-mails: Selection of templates
- ✓ E-mails: Own templates for e-mails
- ✓ Reservations: Mass edit status
- ✓ Reservations: Apply filter by services
- ✓ Reservations: Campaign
- ✓ Own products: Currency in tariffs
- ✓ Search&book hotels: Send offers to e-mail
- ✓ Search&book transfers: Send offers to PDF or e-mail
- ✓ Search&book packages: Navigation
- ✓ Search&book packages: Notifications to suppliers
- ✓ UI/UX: Login form changes
- ✓ UI/UX: Filter reservations by services
- ✓ Move on front: Own products
- ✓ Move on front: Locations, venues, exchange rates
- ✓ Show ? help within system: UG, API documentation, Video guides

# 1. New Capabilities

When a new e-mail is being sent from the system, it's based on certain e-mail template that can be configured via CMS.

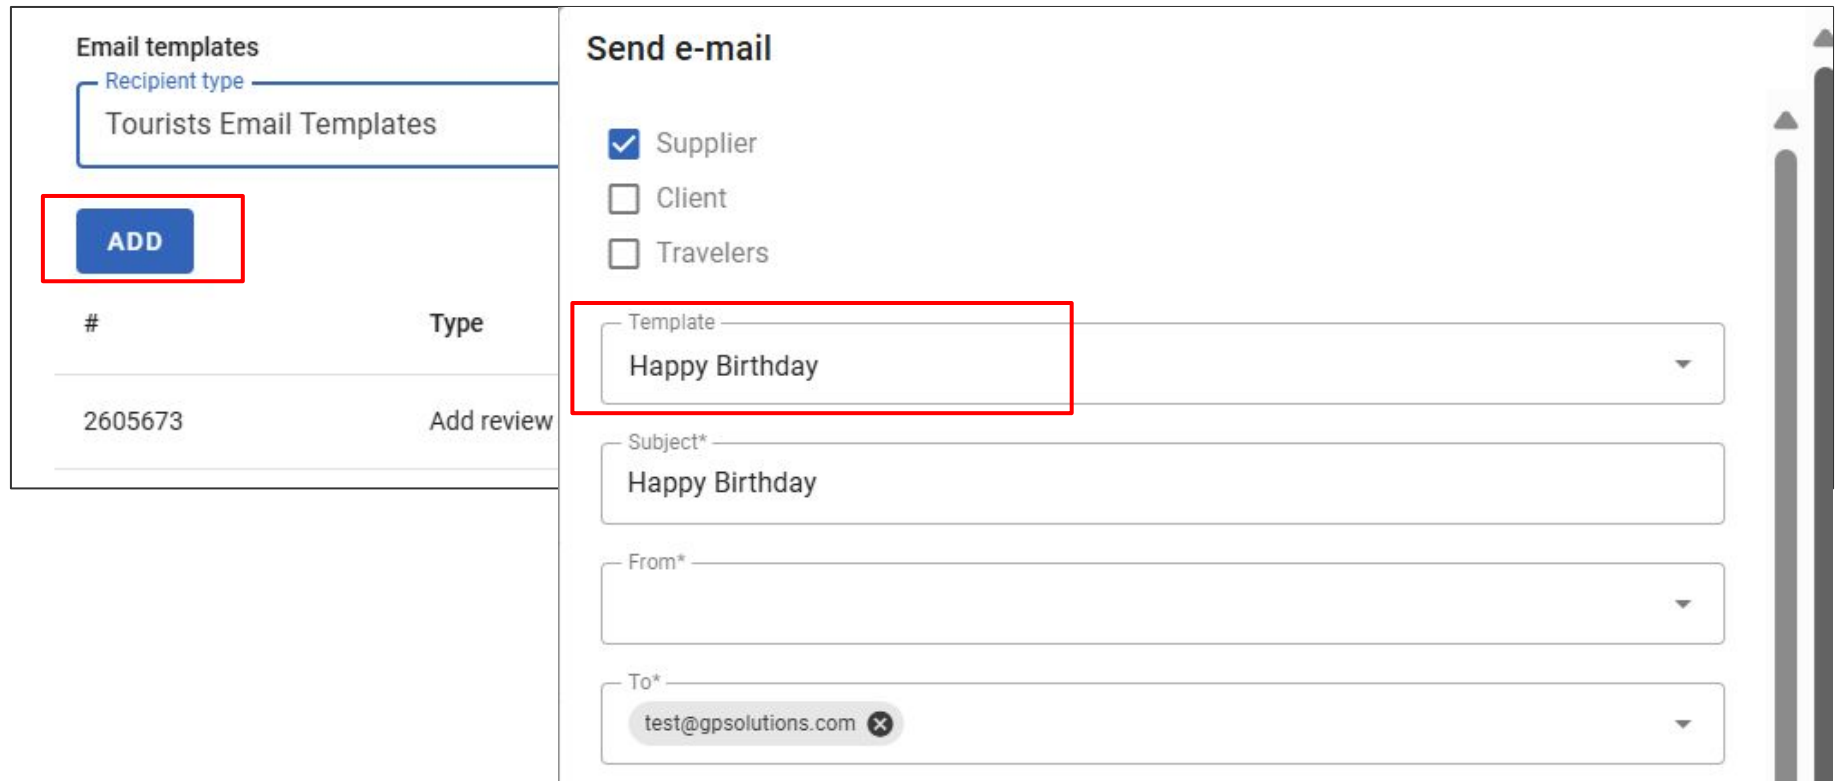

From Release 10.2 now you can also select from templates for manual sending of e-mails - both via Reservation details, from the list of Reservations and from the lists of Clients.

**Access:** Reservations / Clients -> Send e-mail or Mass mail

One more useful enhancement - is ability to create own e-mail templates and use them for e-mails. For example, you can configure template for Birthday congratulations or New Destinations Proposals, or any other reasons.

As usual, you can also use placeholders within templates for flexibility.

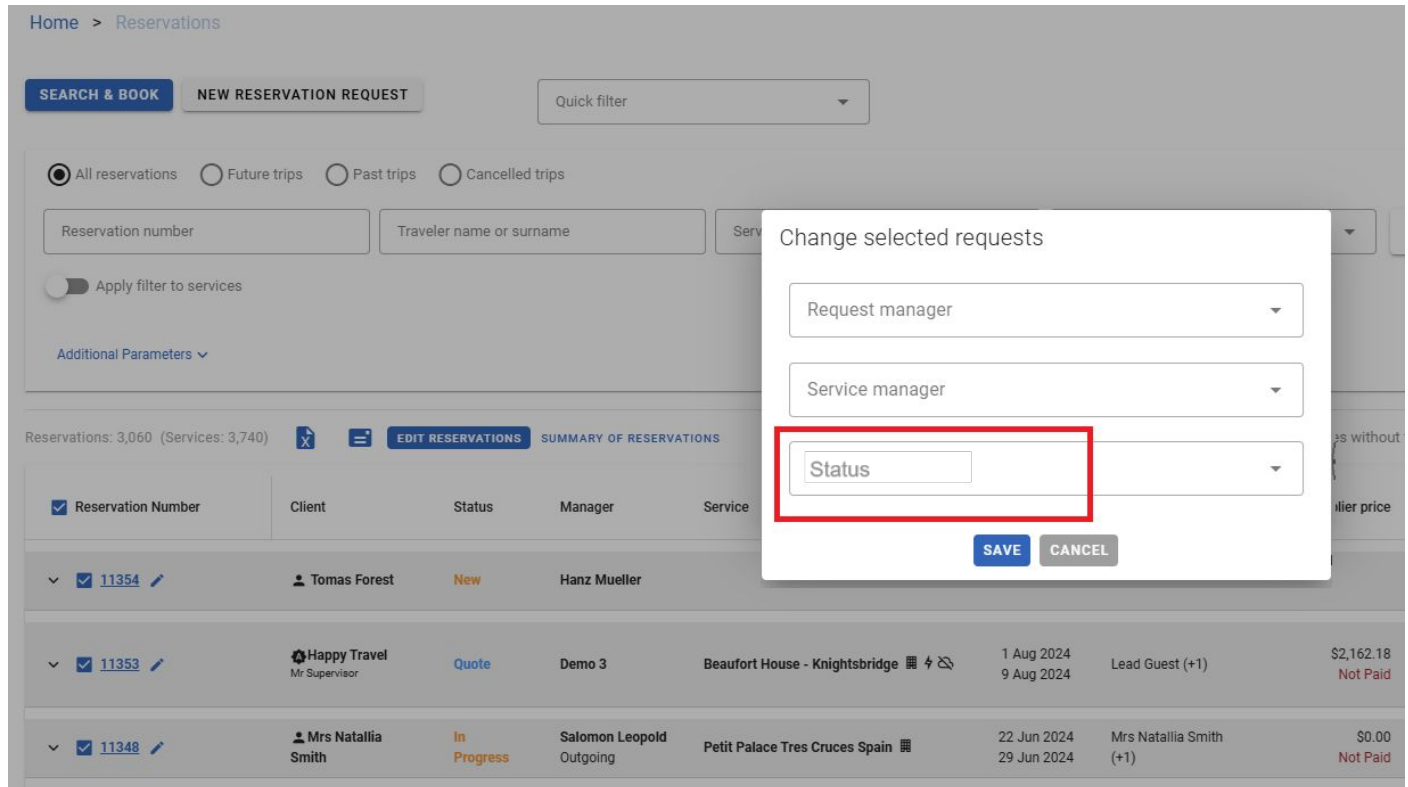

The screenshot displays the 'Send e-mail' configuration interface. On the left, under 'Email templates', a search box contains 'Tourists Email Templates' and a blue 'ADD' button is highlighted with a red box. Below this is a table with two columns: '#' and 'Type'. The table contains one entry: '# 2605673' and 'Type Add review'. On the right, the 'Send e-mail' section includes three checkboxes: 'Supplier' (checked), 'Client' (unchecked), and 'Travelers' (unchecked). Below these are four input fields: 'Template' (with 'Happy Birthday' selected and highlighted by a red box), 'Subject\*' (with 'Happy Birthday'), 'From\*', and 'To\*' (with 'test@gpsolutions.com' and a close icon).

#	Type
2605673	Add review

**Access:** Reservations / Clients -> Send e-mail or Mass mail

Within Reservations it's possible to manage their workflow from New to In progress and Completed. Previously you could change status only within reservation details.

Starting from Release 10.2 it's now possible to edit status for multiple reservations immediately from their list. It's especially helpful for the situations when you need e.g. to change status for B2C self-bookings or other situations.

The screenshot shows the 'Reservations' page with a modal window titled 'Change selected requests'. The modal contains three dropdown menus: 'Request manager', 'Service manager', and 'Status'. The 'Status' dropdown is highlighted with a red box. Below the dropdowns are 'SAVE' and 'CANCEL' buttons. The background shows a table of reservations with columns for Reservation Number, Client, Status, Manager, and Service.

Reservation Number	Client	Status	Manager	Service
11354	Tomas Forest	New	Hanz Mueller	
11353	Happy Travel Mr Supervisor	Quote	Demo 3	Beaufort House - Knightsbridge
11348	Mrs Natalia Smith	In Progress	Salomon Leopold Outgoing	Petit Palace Tres Cruces Spain

**Access:** Reservations -> Mass edit

Minor changes have been made to “apply filter by services” option from Reservations filter - now it’s switched ON by default, when filter is applied - rows are automatically expanded and total price in summary rows NOT shown (just not to confuse - e.g. if we filter just to see Accommodations of certain Supplier - then only corresponding services and prices for them are shown).

If filter by services not applied - then previous logic is used (with default collapsed view of services).

<input type="checkbox"/> Reservation Number	Client	Status	Manager	Service	Dates	Traveler (-s)	Supplier price	Client price	Income
<input type="checkbox"/> <a href="#">3177</a> 	 Mrs Tanya Ivanova	Completed	Myla Bright Sales						
		Confirmed NH hotels		 <b>Park Hotel Madrid</b> Suite Garden View with Terrace, Room Only Spain, Madrid	24 Sep 2024 26 Sep 2024	Mrs Tanya Ivanova	\$200.00 Commission: \$20.00 Net amount: \$180.00	\$220.00 	\$40.00
<input type="checkbox"/> <a href="#">3175</a> 	 Mr John Doe	Completed	Harris Harrison						
		Confirmed NH hotels		 <b>Park Hotel Madrid</b> Suite Garden View with Terrace, Room Only Spain, Madrid	2 Sep 2024 3 Sep 2024	Mr John Doe	\$100.00 Commission: \$10.00 Net amount: \$90.00	\$130.00 	\$40.00

In Release 10.2 we also extended marketing capabilities of the system - and now if there are some Campaigns - it's possible to link them to reservations to calculate campaign outcome (how much was earned).

Right now this is performed manually. In future will be possible to calculate automatically.

From search results of hotels now it's possible not only generate PDF or Excel or Word file with selected hotel offers, but also send them to e-mail.

The screenshot shows a search results page for hotels. A modal window is open, allowing the user to send offers to their email. The modal contains the following elements:

- Offers to compare: 1 **CLEAR SELECTION**
- Send to E-mail:  PDF  Excel  Word
- E-mail:
- SEND**

Below the modal, a blue bar indicates "280 offers found". The main content area is titled "CLOSE COMPARISON" and displays details for "Central Hotel Golders Green".

**Access:** Packages search results -> Book

When some service is booked from inventory, based on Supplier Notification settings - the system sends automatically e-mail to supplier informing about a new booking.

But if e.g. hotel is a part of package - usually it's not needed to send such notifications at the moment of booking. Instead Tour Operator can just send rooming list certain time before arrival.

In  
added  
that  
EVERY  
service  
notification  
those  
a part of package.

**Access:** Automatically

*Please, contact support team if you would like to turn ON this option.*

For more convenience we have improved UI of login form - now it's easier to switch between section for B2C users and partners login.

Within Reservations filter few changes were introduced for easier access to necessary information and clearer understanding of how results are presented:

1. By default “filter to services” option is ON
2. Services in search results are immediately expanded
3. And if “filter to services” is applied - then summary row no longer shows total information from reservation (which was confusing)

The screenshot shows the 'SEARCH & BOOK' interface for 'NEW RESERVATION REQUEST'. It includes a 'Quick filter' dropdown, 'Selected Filters' (Apply filter to services, Process statuses: Confirmed), and search criteria like 'Reservation number', 'Traveler name or surname', 'Services status', and 'Reservations status'. A red box highlights the 'Apply filter to services' toggle, which is currently turned on. Below the filters, there are navigation tabs for 'SUMMARY OF RESERVATIONS' and 'RECEIVE SUPPLIER INVOICES', along with a 'Show commission' checkbox. The main table displays reservation details with columns for Reservation Number, Client, Status, Manager, Service, Dates, Traveler (-s), Supplier price, Client price, Due to Pay from Client, and Income. A red box highlights the 'Supplier price', 'Client price', 'Due to Pay from Client', and 'Income' columns for two reservations.

Reservation Number	Client	Status	Manager	Service	Dates	Traveler (-s)	Supplier price	Client price	Due to Pay from Client	Income
3173	Mr a a	In Progress	To1 User							
		Confirmed		test tour	7 Aug 2024	Mr a a	\$111.00	\$145.00		\$34.00
3142	James Smith	In Progress	GP Support							
		Confirmed		Melia Madrid Princesa	31 Jul 2024	Mr James Smith (+1)	€500.00	\$696.00		\$161.00

We continue moving to modern front end all functionality from back-office and in Release 10.2 we have implemented most of capabilities for Own Products - with ability to view lists of them, create, fill in information, prices and availability.

Please, note that current implementation is **BETA** and will be finished in next release.

<a href="#">Test Hotel</a>	NTO	Australia	Melbourne	Test en	5*	<input checked="" type="checkbox"/> Active    

**Access:** Products

In Release 10.2 you can also view and manage Locations on front end - countries, cities and location points.

The screenshot displays the GP Travel Enterprise interface. At the top, there is a navigation bar with tabs for RESERVATIONS, SCHEDULER, PRODUCTS, FINANCE, REPORTS, BI, MY COMPANY, and GP. Below this, a search bar and a language selector (English) are visible. The main content area shows a 'Locations' configuration modal. The modal includes the following fields:

- Name: Victoria station
- Country: United Kingdom
- City: London, United Kingdom
- Address: Victoria Station 1
- Postal Code: (empty)
- Latitude: 51.49263
- Longitude: -0.14861

A map of London is shown to the right of the form, with a red pin indicating the location of Victoria Station. The modal also features a 'SUBMIT' button and a 'CLOSE' button. In the background, a navigation menu is open, with the 'Locations' option highlighted by a red box. Other menu items include Templates, CMS, Translation keys, Venues, Exchange rates, All users, All companies, and Registration requests.

**Access:** Configuration -> Locations

Now you can also create Venues - places, where concerts and sport events may take place. Afterwards it's possible to select them for Events.

The screenshot displays the 'GP Travel Enterprise' interface. At the top, there is a navigation bar with options like RESERVATIONS, SCHEDULER, PRODUCTS, FINANCE, REPORTS, BI, MY COMPANY, and GP. Below this, there are recent views for 'Louvre Private Visit', 'Reservation N° 3148 Paris Weekend', and 'Reservation N° 3173'. The main content area shows the 'Venues' configuration form. The form has a language dropdown set to 'English' and an 'Active' toggle. The fields are: Name (Royal Albert Hall), City (London), Address (Kensington Gore), Postal Code (SW7 2AP), Latitude (51.50104), and Longitude (-0.17730). Under 'Available for:', the 'Concert' checkbox is checked. To the right of the form is a map showing the location of the Royal Albert Hall in London. On the far right, a configuration menu is open, listing various settings like Templates, CMS, Translation keys, Locations, Venues (highlighted in red), Exchange rates, All users, All companies, and Registration requirements.

**Access:** Configuration -> Venues

And one more setting that is currently available on front is currency exchange rates. You can both view rates uploaded automatically, and manage exchange rates manually (depending on what mode is turned on in your installation).

For getting help and assistance on functionality of the system you can consult User Guides or Training Videos. For your convenience now they are available directly from the system via “?” section.

You can also find there Release Presentation of GP Travel Enterprise, as well as access to API Documentation.

We hope this will make using of the system as efficient and convenient as possible!

## 2. API Changes

## Add new sections to the REST API:

- ✓ "EventContracts"
- ✓ "ExtraServiceContracts"
- ✓ "TourContracts"
- ✓ "InsuranceContracts"
- ✓ "VisaContracts"
- ✓ "CruiseContracts"
- ✓ "ManualExchangeRates"
- ✓ "Settings"

## New API methods are added:

### EventContracts:

- ✓ **GET** /ownEventContracts - to get existing/added Event contracts
- ✓ **POST** /ownEventContracts - create/add a new contract on Event
- ✓ **PUT** /ownEventContracts - edit the existing/added Event contract

### Persons:

- ✓ **POST** /departments - create a department
- ✓ **PUT** /departments - update a department
- ✓ **PATCH** /departments - activate/Deactivate department

### Package:

- ✓ **POST** /packagePrograms - create/add a new package program

## New API methods are added:

### Companies:

- ✓ **GET** /companyRegistration - shows a list of companies that are waiting registration in the system
- ✓ **POST** /companyRegistration/{companyId}/activate - activates the Registration Request
- ✓ **POST** /companyRegistration/{companyId}/delete - deletes the Registration Request

### TourContracts:

- ✓ **GET** /ownTourContracts - to get existing/added Tour Contracts contracts
- ✓ **POST** /ownTourContracts - create/add a new contract on Tour Contracts
- ✓ **PUT** /ownTourContracts - edit the existing/added Tour Contracts contract

### ManualExchangeRates:

- ✓ **GET** /manualExchangeRates - get manual exchange rates for currency
- ✓ **POST** /manualExchangeRates - add new manual exchange rate for currency

### Locations:

- ✓ **GET** /locationsPoints - to get existing/added Location Points
- ✓ **POST** /locationPoints - created/add Location Points
- ✓ **PUT** /locationPoints - edit the existing/added Location Points
- ✓ **GET** /venues - to get existing/added event venues
- ✓ **POST** /venues - create/add a new contract on event venues
- ✓ **PUT** /venues/{venueId} - edit the existing/added event venues

### Settings:

- ✓ **GET** /productBookingFieldsSettings - to get existing/added product booking fields settings
- ✓ **PUT** /productBookingFieldsSettings - edit the existing/added product booking fields settings

## New API methods are added:

### CharterContracts:

- ✓ **GET** /ownCharterContracts - to get existing/added Charter Contracts
- ✓ **POST** /ownCharterContracts - create/add a new contract on Charter
- ✓ **PUT** /ownCharterContracts - edit the existing/added Charter contract
- ✓ **GET** /charterExtraServices - get charter extra services
- ✓ **POST** /charterExtraServices - create charter extra services
- ✓ **PUT** /charterExtraServices - update charter extra services
- ✓ **GET** /ownCharterTariffs - get own charter tariffs
- ✓ **POST** /ownCharterTariffs - create own charter tariffs
- ✓ **PUT** /ownCharterTariffs - update own charter tariffs
- ✓ **GET** /ownCharterServices - get own charter service
- ✓ **POST** /ownCharterServices - create own charter service
- ✓ **PUT** /ownCharterServices - update own charter service
- ✓ **GET** /ownCharterServiceCategories - get own product service categories
- ✓ **POST** /ownCharterServiceCategories - create own service categories
- ✓ **PUT** /ownCharterServiceCategories - update own service categories

### CruiseContracts:

- ✓ **GET** /ownCruiseContracts - to get existing/added Cruise contracts
- ✓ **POST** /ownCruiseContracts - create/add a new contract on Cruise
- ✓ **PUT** /ownCruiseContracts - edit the existing/added Cruise contract
- ✓ **GET** /shipContent - get ships
- ✓ **POST** /shipContent - save ship
- ✓ **PUT** /shipContent/{shipId} - update ship

## New API methods are added:

### InsuranceContracts:

- ✓ **GET** /ownInsuranceServices - to get existing/added Insurance services
- ✓ **POST** /ownInsuranceServices - create/add Insurance service
- ✓ **PUT** /ownInsuranceServices - edit the existing/added Insurance services

### TransferContracts:

- ✓ **GET** /OwnTransferContracts - to get existing/added Transfer contracts
- ✓ **POST** /OwnTransferContracts - create/add a new contract on Transfer
- ✓ **PUT** /OwnTransferContracts - edit the existing/added Transfer contract

### ExtraServiceContracts:

- ✓ **GET** /ownExtraServiceContracts - to get existing/added Own Extra Service contracts
- ✓ **POST** /ownExtraServiceContracts - create/add a new contract on Own Extra Service
- ✓ **PUT** /ownExtraServiceContracts - edit the existing/added Own Extra Service contract

### VisaContracts:

- ✓ **GET** /ownVisaContracts - to get existing/added Visa contracts
- ✓ **POST** /ownVisaContracts - create/add a new contract on Visa
- ✓ **PUT** /ownVisaContracts - edit the existing/added Visa contract

### AccommodationContracts:

- ✓ **GET** /ownAccommodationContracts - to get existing/added Accommodation contracts
- ✓ **POST** /ownAccommodationContracts - create/add a new contract on Accommodation
- ✓ **PUT** /ownAccommodationContracts - edit the existing/added Accommodation contract

## New parameters are added to the existing API methods:

### Persons:

- ✓ **GET** /departments:
  - now supports localization for: name, fullLegalName, legalAddress, address, bankName, ceoName

### Companies:

- ✓ **GET** /companies:
  - parameter 'signature' is added to the response
- ✓ **POST** /companies:
  - parameter 'signature' is added to request and response
- ✓ **PUT** /companies:
  - parameter 'signature' is added to request and response

### ExchangeRates:

- ✓ **GET** /exchangeRates:
  - parameter 'date' is added to the request

### Orders:

- ✓ **POST** /orderManagers renamed to /massEditOrders and added 'status' parameter to the request

### AccommodationContracts:

- ✓ **GET** /ownHotelPrices:
  - 'hotelCurrency' removed from AccommodationInfo and currency added to AccommodationTariff
- ✓ **GET** /ownAccommodationContracts:
  - parameter 'transactionsCurrency' is added to the response
- ✓ **POST** /ownAccommodationContracts:
  - parameter 'transactionsCurrency' is added to the request and response

Dear clients!

We hope that you will find these enhancements useful.

Send your questions, feedback and suggestions to our e-mail address [gpte@software.travel](mailto:gpte@software.travel) with “Release 10.2” in the subject line.
