

GP Travel Enterprise Release 10.3

Presentation

Nov 6, 2024

Dear clients and partners!

We are happy to announce **Release 10.3** of **GP Travel Enterprise** that contains a lot of new valuable modules to extend your position on the market, as well as additional functionality for better coverage of travel business processes.

We also continue transition on new modern front end technology and introduce some changes to UI/UX experience.

For scheduling the delivery dates please contact our support team.

Enhancements

New Modules:

- ✓ VOIP integration
- ✓ Seat map
- ✓ Trip assistant
- ✓ Guinness excursions
- ✓ Intui transfers
- ✓ iWay transfers
- ✓ Exely hotels channel manager
- ✓ iOL hotels
- ✓ Flywire payment gateway
- ✓ BI: KPIs
- ✓ CRM: Leads

New Capabilities:

- ✓ UI/UX enhancements: Home page
- ✓ UI/UX enhancements: Reservations details
- ✓ UI/UX enhancements: Clients currency from contract settings

Enhancements

New Capabilities:

- ✓ Own products: Publishing
- ✓ Own products: Internal notes
- ✓ Own products: Departments
- ✓ Own products: Default release dates
- ✓ Own products: Update reservations after changes
- ✓ Hotels: Prices based on allocation
- ✓ Hotels: Extra services prices based on allocation
- ✓ Transfers: Bus, boat or plane identifier
- ✓ Transfers and Activities: Tiered prices based on quantity of passengers
- ✓ Simple tours: Multi-day itinerary, destinations and hotels

Enhancements

New Capabilities:

- ✓ Package tours: Prices
- ✓ Offline services: Flights parsing
- ✓ Offline services: Show real product type
- ✓ Search&book flights: Branded fares from GDSs
- ✓ Search&book hotels: Replace descriptions for external suppliers
- ✓ Search&book activities: Edit external descriptions
- ✓ Search&book transfers: Search by map
- ✓ Search&book transfers: Search by IATA airport code
- ✓ Search&book transfers: Terminal in booking
- ✓ Search&book transfers: Information about vehicle and driver after booking and QR code in vouchers

Enhancements

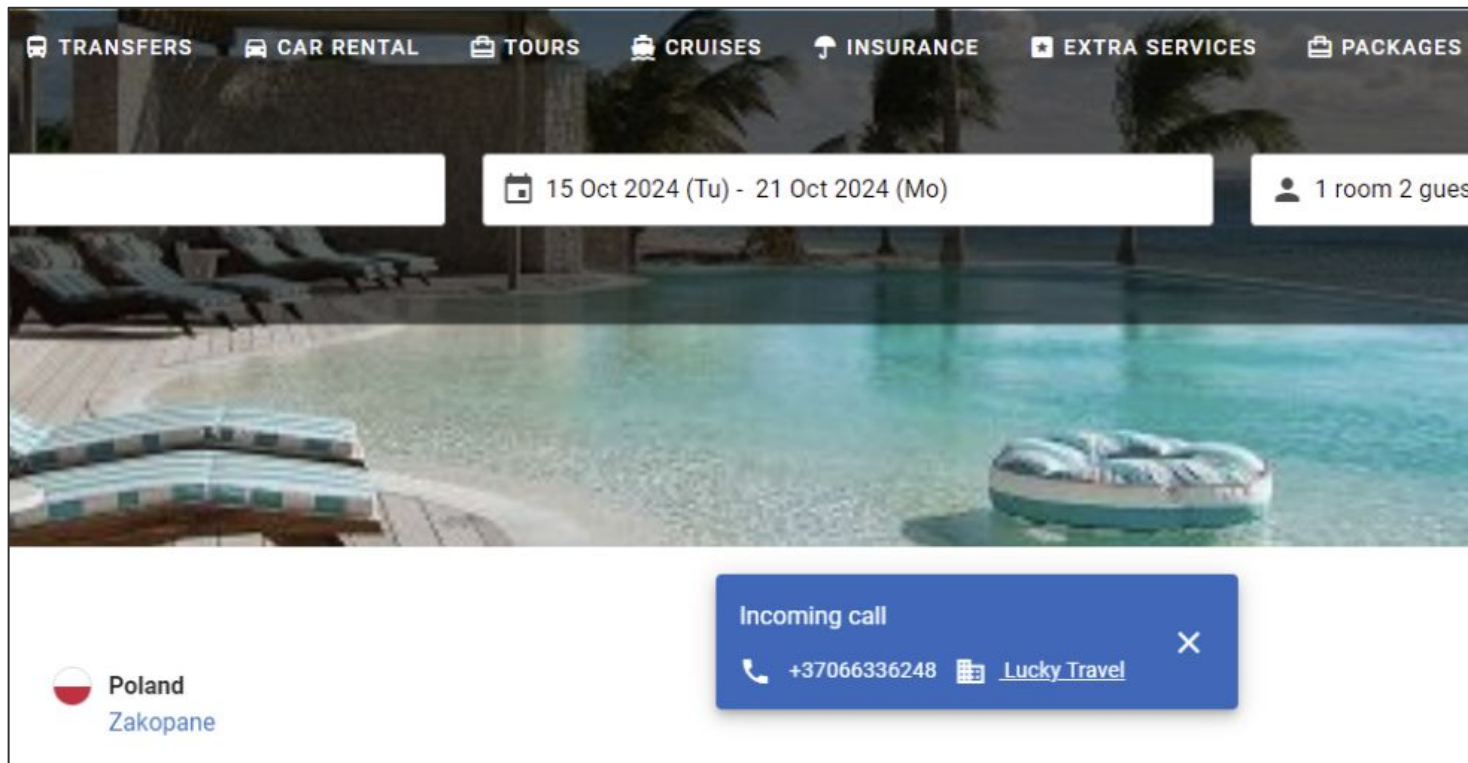

New Capabilities:

- ✓ Reservations: Classification
- ✓ Reservations: History extension
- ✓ Reservations: Income in report
- ✓ Reservations: Edit passengers phone and e-mail
- ✓ Reservations: Print voucher after approval
- ✓ Reservations: Send link to client
- ✓ Quotations: PDF enhancements
- ✓ Reports and analytics: Quotations vs Reservations
- ✓ Finance: Restrictions on transactions
- ✓ Finance: Apply commission on cancelled services
- ✓ Move on front: Own products configuration (information, prices, availability)
- ✓ Move on front: Search&Book simple tours

1. New Modules

VOIP Integration - is ability to connect with your IP telephony to capture client calls and automatically see information about them in the system.

GP Travel Enterprise aims to automate every part of day-to-day routine and with this module it becomes convenient and easy, and also improves quality of service to your clients.

Please contact support team or your account manager to activate this module.

Seat map module allows you to configure and use ability to select seat on bus schema, or show stadium or concert halls maps for further selection of seats.

This gives better visibility of available places and gives your clients ability to define their preferences (free or at surcharge).

Alternatively - you can also assign seats from manual correction and scheduler (if this module is active in your installation).

Home > Vehicle types > Microbus (9)

INFORMATION **SEAT MAP**

Active

SAVE CANCEL

Seat map

Select your seat for just **6 EUR** per passenger. If seat is not selected - then random allocation will be proposed (it's not guaranteed that all passengers will seat together)

Mr James: 20 (+\$6.42) ^

	4	8	12	16	20		28	32	36	40	44	49	
	3	7	11	15	19		27	31	35	39	43	48	
												47	
	2	6	10	14	18	22	24	26	30	34	38	42	46
	1	5	9	13	17	21	23	25	29	33	37	41	45

Please contact support team or your account manager to activate this module.

Trip assistant module - is ability for your travelers to get their trip details and assistance from tour operator, who organizes the trip irrespective whether the booking was made directly from you, or via any 3rd party travel agency.

You can simply give a link to your web site with ability to enter booking number and last name - and to show the day-by-day trip plans. Note, that prices in this case are not shown because they can be different for different agencies.

The screenshot displays a web application interface. At the top, a navigation bar contains the text "Trip assistant" (highlighted with a red box), "FAVORITES", "LOG IN", and "USD". Below this, a modal window titled "Trip assistant" is open, featuring input fields for "Reservation Number*" (containing "3477") and "Last Name*" (containing "Fox"), and a blue "RETRIEVE BOOKING" button. The background shows a calendar for "September - October 2024" with a grid of dates. Below the calendar, a reservation card for "Reservation #3477" is visible, showing details for "RIU Plaza Espana" (5 stars), including the address "C/ Gran Vía, 84, 28013 Madrid, Spain", dates "24 Oct 2024 (Th) From 14:00" to "25 Oct 2024 (Fr) Before 12:00", "1 night", and "Single Standard" room type. A weather forecast for the dates is also shown.

Please contact support team or your account manager to activate this module.

Guinness Excursions module - is the connector to provider of excursions and activities **Guinness**. A new module Guinness offers a wide selection of immersive activities/self-guided tours in Ireland.

Every standard experience includes:

- ✓ Self-Guided Tour
- ✓ Entry to Guinness Tasting Rooms
- ✓ Option to change your booking up to 24 hours before your visit
- ✓ Entry to Gravity Bar and a pint of Guinness, Guinness 0.0 (18+), or a soft drink

Read more - on [Guinness Storehouse](#)

Please contact support team or your account manager to activate this module.

Intui Transfers module - is ability to search& book touristic or business transfers from Airport to Hotels or City-to-City.

- ✓ 175 countries
- ✓ 3500 Airports
- ✓ Lowest rates in Turkey, Egypt, Indonesia ...
- ✓ Transfers in **Maldives**
- ✓ Child/Booster/Baby seats

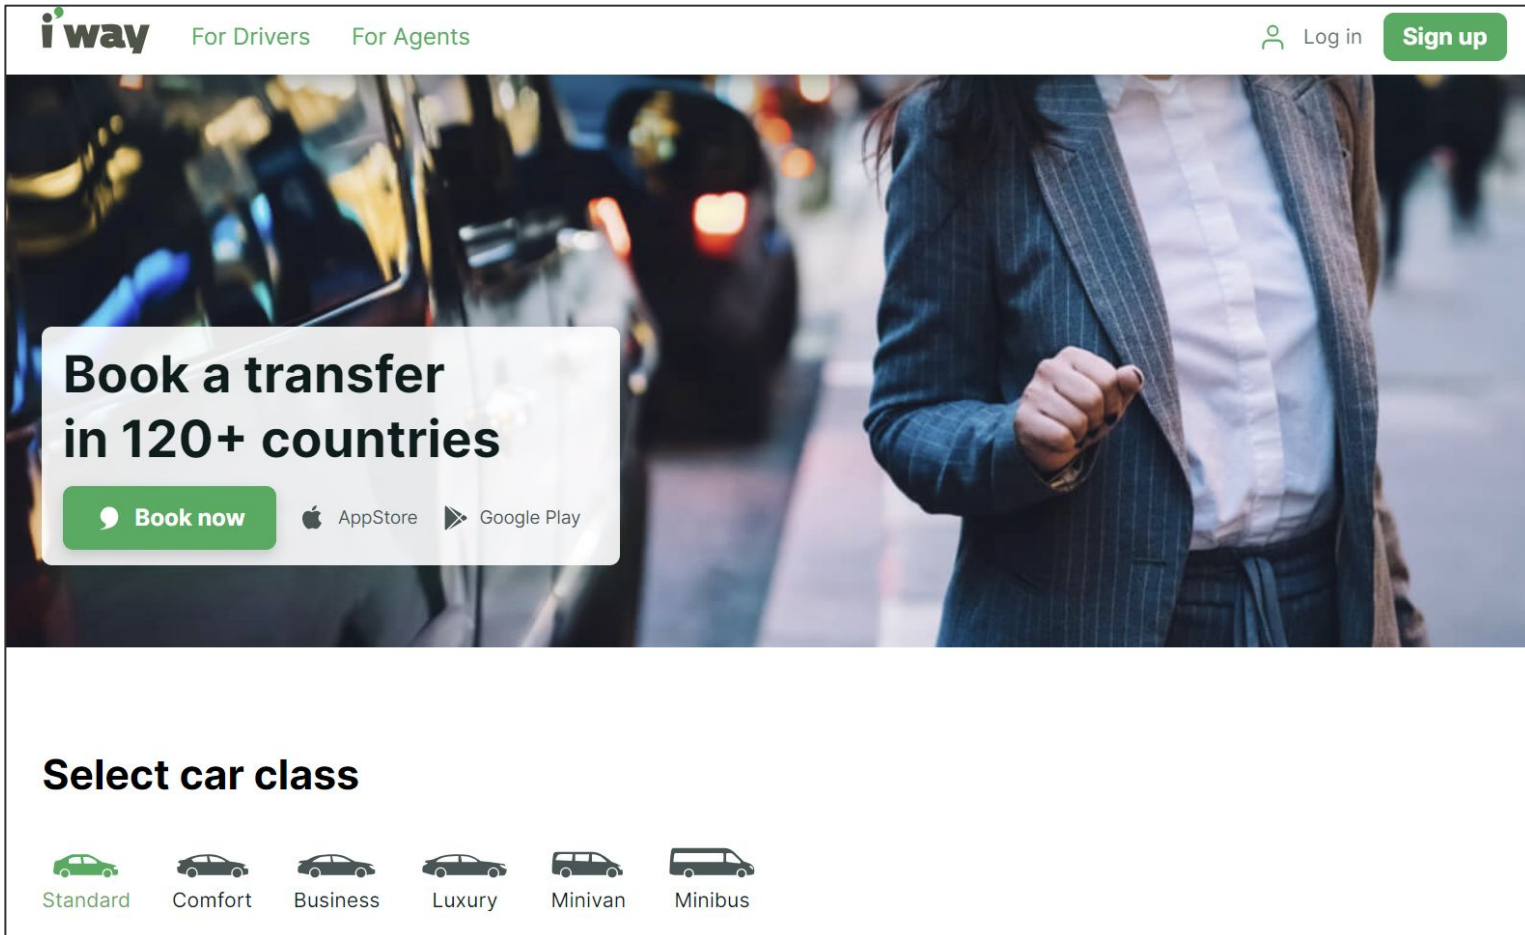

Read more - on intui.travel.

Please contact support team or your account manager to activate this module.

iWay Transfers module - is another transfers connector to your choice with ability to select from various car classes – from standard to luxury, and also minivans and minibuses for your groups.

Read more - on iway.io/

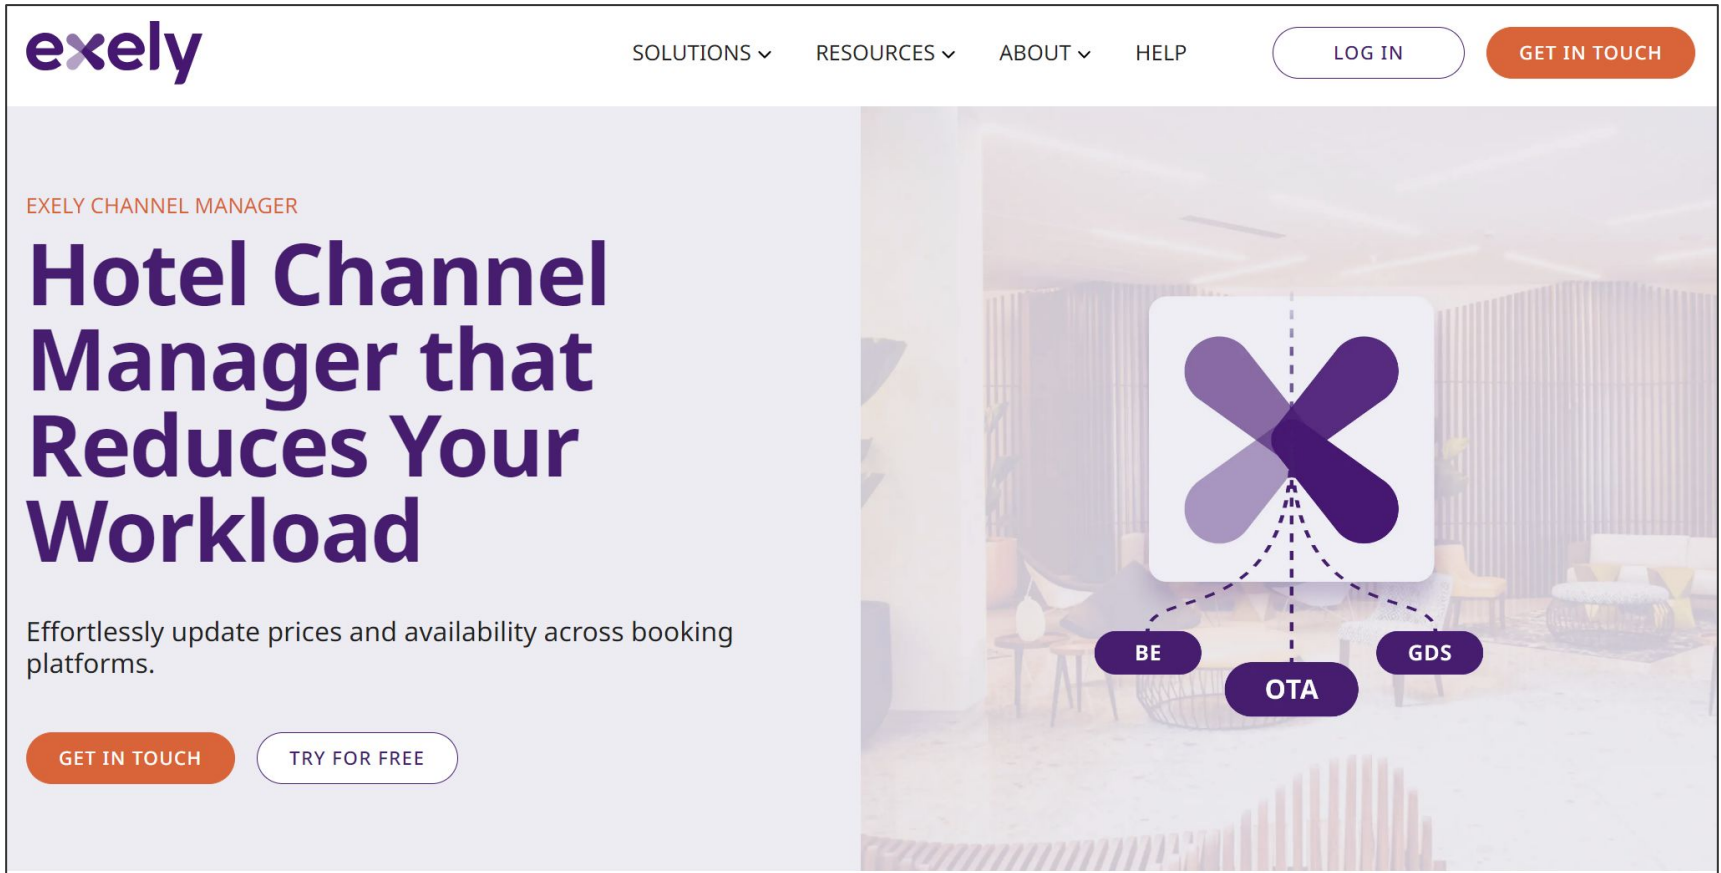

The screenshot shows the iWay Transfers website interface. At the top left is the iWay logo with navigation links for 'For Drivers' and 'For Agents'. On the top right, there are 'Log in' and 'Sign up' buttons. The main visual is a blurred background image of a person in a blue suit. A white call-to-action box on the left contains the text 'Book a transfer in 120+ countries', a 'Book now' button, and links to the AppStore and Google Play. Below this, a section titled 'Select car class' features six icons representing different vehicle types: Standard (green car), Comfort (black car), Business (black car), Luxury (black car), Minivan (black van), and Minibus (black van).

Please contact support team or your account manager to activate this module.

Exely Hotels Channel Manager module - is the ability to get dynamic rates and availability from hotels via channel manager **Exely** in 23 countries of the world.

Check whether they support destinations you're interested in and read more - on exely.com/contacts.

The screenshot shows the Exely website's landing page for the Hotel Channel Manager module. The page features a navigation bar with the Exely logo, menu items for SOLUTIONS, RESOURCES, ABOUT, and HELP, and buttons for LOG IN and GET IN TOUCH. The main content area has a large heading 'Hotel Channel Manager that Reduces Your Workload' and a sub-heading 'EXELY CHANNEL MANAGER'. Below the heading is a paragraph: 'Effortlessly update prices and availability across booking platforms.' At the bottom of the main content area are two buttons: 'GET IN TOUCH' and 'TRY FOR FREE'. On the right side, there is a diagram illustrating the channel manager's role, showing a central 'X' icon connected to three boxes labeled 'BE', 'OTA', and 'GDS'.

Please contact support team or your account manager to activate this module.

iOL Hotels module - is a new Hotels supplier which provides the global marketplace that connects hotel chains directly with a vast B2B demand network, eliminating the need for middlemen like bed banks and wholesalers.

This direct connection enables hoteliers to maintain higher profit margins, as they no longer have to share revenue with intermediaries. At the same time iOL X provides real-time inventory and rate management capabilities.

iOL provides preferred rates via direct connectivity to 20K hotels worldwide including major brands like Hilton and Marriott and IHG.

Read more - on <https://www.iol.world/iol-x.asp>

Flywire Payment Gateway module - allows to get immediate online payments via **Flywire**. Flywire is a global payments enablement and software company, on a mission to deliver the world's most important and complex payments.

The main advantages of Flywire:

- ✓ global payments all over the world
- ✓ secure and fast payment process
- ✓ support of 140+ currencies
- ✓ serving of 240+ countries and territories worldwide

Read more - on [Flywire global payments](#)

Please contact support team or your account manager to activate this module.

BI: KPIs module - is the extension of Business Intelligence capabilities of the system with ability to set goals and track their achievements.

In the current version of the system this is to be set manually, but we plan to continue development of these capabilities for automatic suggestions and help from the system what can be done to achieve KPIs.

Please contact support team or your account manager to activate this module.

CRM: Leads module - is the extension to CRM capabilities of the system with ability to track Leads and potential requests from Agencies for cooperation.

Recently it was already possible to put online Registration form from agencies, now it's also possible to create leads manually.

The screenshot displays the GP Travel Enterprise CRM interface. The top navigation bar includes 'GP Travel Enterprise' and various menu items like 'RESERVATIONS', 'SCHEDULER', 'PRODUCTS', 'FINANCE', 'REPORTS', 'BI', 'MY COMPANY', and 'SUPPORT'. Below the navigation bar, there are buttons for 'NEW LEAD', 'MASS EDIT', and 'SEND E-MAIL'. A table of 'Registration requests' is visible, with columns for Name, Type, Country, City, Phone, E-mail, Registration date, Rating, and Status. The 'Leads / Registration requests' menu item is highlighted in red in the 'MY COMPANY' dropdown menu.

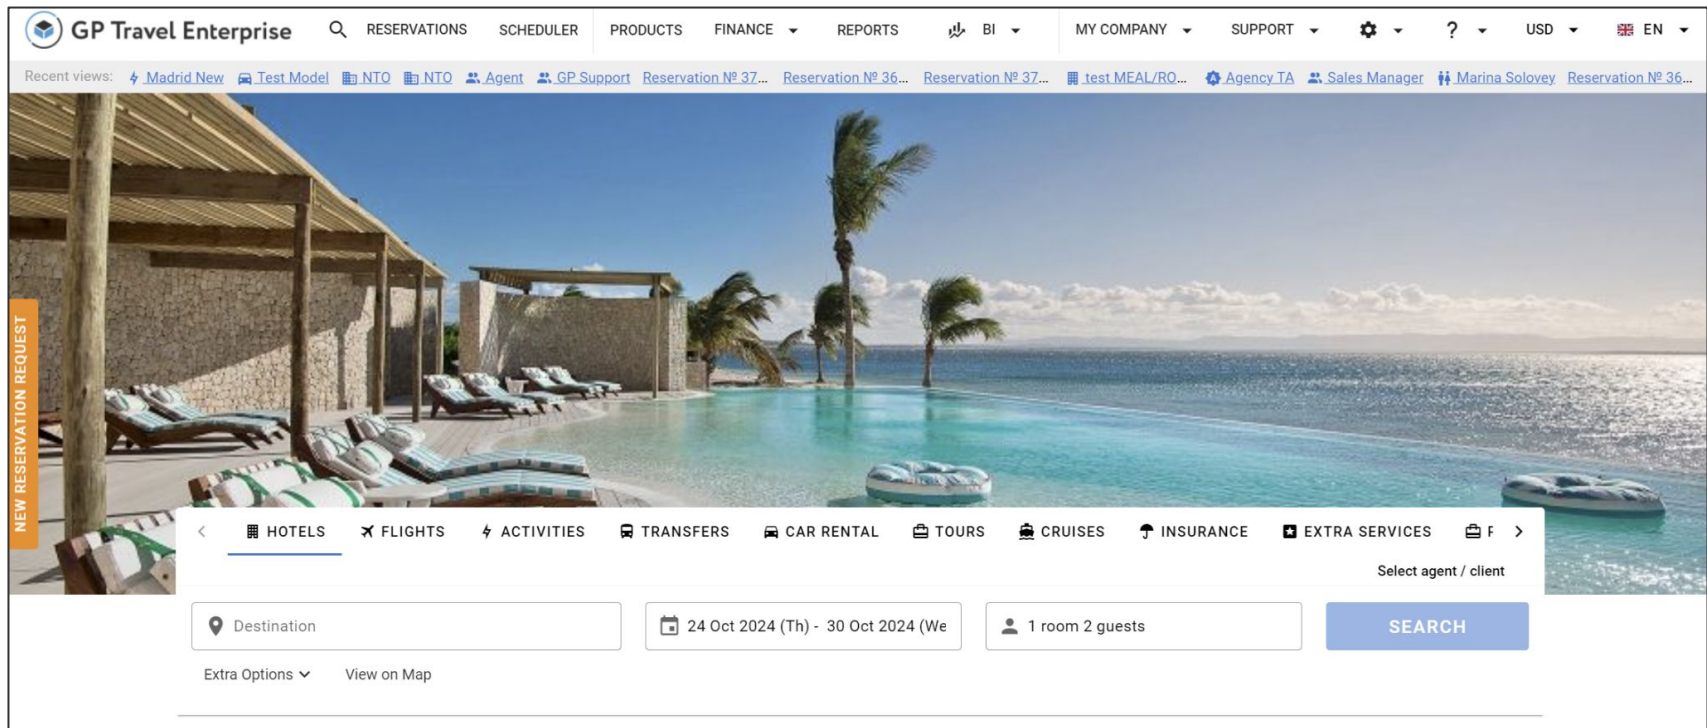

Name	Type	Country	City	Phone	E-mail	Registration	Rating	Status
Test Agency	Travel agency	Abkhasia	Alakhadzi	+21323402342	test@gpsolutions.com	22 Oct 2024 (Tu) 10:22	1	Active

Please contact support team or your account manager to activate this module.

2. New Capabilities

In order to make system look more modern and easy-to-use we suggest refreshed look&feel of home page:

- ✓ Use white background for search box instead of transparent
- ✓ And bottom payout

Access: Home page

Please, contact support if you would like to update this in your installation

Within Reservation details in Release 10.3 we have also made some improvements:

- ✓ Better showing of prices for Tour Operator, including information about income
- ✓ Moving “Attachments” to a separate tab
- ✓ Moving some settings to “Configuration” and “Manage reservation” buttons and add to Archive from there
- ✓ Adding possibility to see total price in base currency for multi-currency reservations
- ✓ Improving mobile view

The screenshot shows the reservation details for reservation #3811. Key elements highlighted in orange boxes include:

- Reservation #3811** with an "Add title" field and "In Progress" status.
- Navigation tabs:** SERVICES, COMMUNICATIONS (1), INTERNAL NOTES (0), and ATTACHMENTS (0).
- Lead Guest:** Mr Amd Abd, test@gpsolutions.com, +375291111111.
- Vehicle:** Paris Orly Airport - 13th arrondissement (Paris) (Sedan Toyota Prius Plus or Similar 2019).
- Check-in/Check-out:** Pick up: 30 Oct 2024 (We) 13:00, Drop off: 30 Oct 2024 (We).
- Price Summary:**

Client price	\$125.00
Supplier price	\$95.73
Income	+\$29.27
- Summary Table:**

Client price	\$125.00
Supplier price	\$95.73
Income	+\$29.27
- Management Buttons:** Display settings, Manage reservation.

If you need to use the configuration of contract currency for your clients during search&book process now there is an ability to apply it automatically after the client login on the website and the correct currency from configuration will be used.

The screenshot displays the GP Travel Enterprise interface. At the top, the navigation bar includes 'RESERVATIONS', 'FAVORITES', 'REPORTS', and 'BI'. The user's company and location are set to 'USD' and 'EN'. The search results for 'London, United Kingdom' show a 5-star hotel at 37, Trendy Lane, with a price of \$660.00. The price is highlighted with a red box. A 'BOOK' button is visible next to the offer. The map on the right shows the location of the hotel in London.

Access: Search&book

Preparation of own products for sales may take some time, so now we give you ability to fully control this process - instead of immediate ability to see created products during search&book, now you can decide whether they are “Draft”, “On approval” or “Published”.

Only “Published” products will become available for sales, so you can introduce internal review process as well.

When adding, amending or deleting sections in the product contracts such as Tips, Itinerary (destinations for Cruise), Duration, Service Name, Supplier Name of Tour, Departure Time, Meeting Point - now there is an option to update existing reservations if required.

For example, the meeting point for a tour has now changed, and if user requests to update it in all further reservations - the system does it automatically.

One more type of price list has been implemented for hotels - based on allocation. It is useful for the situation when hotel provides so sophisticated price list which cannot be specified as “price per pax” or “price per room”, but instead gives all possible combinations of guests and prices for them.

As shown on the example here:

Prices	
Extra charge for board type	
Meal Type	Adult*
BBT	<input type="text"/>
BB	<input type="text"/>
Room Only	<input type="text"/>
Base allocation prices	
Room price*	
▼ Suite Garden View with Terrace	
1 adult	<input type="text" value="100"/>
2 adults	<input type="text" value="120"/>
1 adult + 1 child (0 - 17)	<input type="text" value="90"/>
1 adult + 2 children (0 - 17) (0 - 17)	<input type="text" value="130"/>

Access: Products -> Hotels -> open hotel -> “Prices” tab -> “Price lists” -> create new “**Price list based on allocation**”

Also for extra services within hotel it can be the rule, that some of them are offered only for those guests who are on main bed, or extra bed.

This setting has also been added to the system.

en de es fr it

Sharing

Access: Self Operated products -> Hotels -> Open hotel -> Extra Services tab

Some transfers from point A to B can be organized on airplane or boat (e.g. transfer within islands, like Maldives, etc.).

In order to highlight this fact - you can specify the transfer variant with a wide choice from car/bus, boat/ferry, plane, helicopter... and during search&book a special identification will be added to show exact way of travel for each option.

 HOTELS	 FLIGHTS	 TRANSFERS	 ACTIVITIES	 EXTRAS	 PACKAGE TOURS
CREATE					
Filters 					
Name	Supplier	Type	Variant	Pick up	
CAPPADOCIA - KAYSERI AIRPORT - PRIVATE TRANSFER	BEST CAPPADOCIA TOUR	Private		Cappadocia, Hotel/Address	
SIC / SHUTTLE - NEVSEHIR AIRPORT TO CAPPADOCIA HOTELS	BEST CAPPADOCIA TOUR	Shared	 Helicopter	Cappadocia, Input name manually	
Istanbul Bosphorus Yachts Cruise Rental	Transfer Supplier	Shared	 Boat / ferry	Istanbul, Istanbul Port, Port	

Access: Products -> Transfers -> open transfer -> select “Product variant”

The prices for transfers and activities sometimes depend on quantity of passengers in the group, and such logic will also be supported in **GP Travel Enterprise** starting from Release 10.3.

For each product you can create as many ranges as required according to your original prices from suppliers.

Access: Products -> Transfers/Activities -> open product -> tab “Prices” -> “Price lists”

In order to be able to provide more details for clients about day-by-day plans and destinations that will be visited as a part of Tours program, these details have been added to this product configuration.

Additionally it's possible to select hotels, in which user will stay - to show full description of hotels during search&book.

For those who sell package tours now we can offer 2 options, how to configure prices - either based on each component (as previously), or ability to define selling rates for the whole season manually.

This allows to take into account various additional expenses and publish package rates that no longer depend on fluctuation of costs from suppliers.

Please, note that before defining prices you need to specify tour categories (standard, deluxe...) and accommodation options in advance.

When user adds flight as Offline Service it usually takes time to fill in all flight data, and it may also lead to mistakes. Now as an alternative way of entering this data we have added parsing from text format - so you can copy the flight schedule and route from GDS and simply insert this into the system.

Add offline service

Type: Flight | Status: Quote | Name*: Gdansk-Adelaide and back | Ref #: | Supplier*: | [UPDATE PNR FROM GDS](#) | [Add supplier](#)

14 Oct 2024 (Mo) - 20 Oct 2024 (Su) | Quantity of pax: | Airline: | [AUTO PARSING FLIGHT DETAILS](#) +

Details 1

Departure Airport: | Departure Terminal: | Arrival Airport: | Arrival Terminal: | Flight Number: | Flight Class: | Meal included

QR6122 20OCT DOH - HEL 08:10 15:15
QR6181 20OCT HEL - GDN 18:00 19:05
```

Access: Reservations -> Add Offline Service -> select type "Flight"

Previously Offline Services were treated as a separate type of products, even though there were types “Hotel”, “Flight”, etc.

Now we have revised the whole system and added them to general analytics of corresponding type (e.g. “Hotels”) irrespective whether this hotel is booked via API connection, or from inventory, or added as offline service. Additionally you can filter by “Source of service” to see only bookings from Inventory, via API connections or added as Offline services.

The screenshot shows the 'NEW RESERVATION REQUEST' filter interface. It includes a 'Quick filter' dropdown, radio buttons for reservation status (All reservations, Future trips, Past trips, Cancelled trips), and various search filters. The 'Source of service' dropdown is highlighted with a red box, showing options: 'Selfoperated products', 'API connection', and 'Offline service'.

Access: List of Reservations, Dashboards, Reports

When searching flights usually GDSs return only the cheapest fare. But sometimes users require something more advanced - e.g. with additional baggage, cancellation options, etc. This can be covered by branded fares, which are now also supported in the system.

Please, note that it might be necessary to activate this capability in GDS, and then it can be turned on in GP Travel Enterprise as well.

The screenshot displays a flight search interface with the following details:

- Flight 1:** Norwegian, 10:00 LGW (15 Oct 2024) to 16:45 BER (15 Oct 2024), 5h 45m, 1 stop CPH.
- Flight 2:** Norwegian, 12:15 BER (21 Oct 2024) to 16:20 LGW (21 Oct 2024), 5h 5m, 1 stop ARN.
- Summary:** Sabre, DETAILED INFO, FARE RULES, Baggage allowances (NOT included in the current tariff).
- Lowfare / ECONOMY:** Supplier price: \$153.80, \$200.00 (Non Refundable), BOOK button, HIDE TARIFFS, only 4 seats are available.
- Lowfare plus / ECONOMY:** \$372.00 (Non Refundable), FARE RULES, Baggage allowances (up to 1 piece(s) - free), BOOK button.
- Flex / ECONOMY:** \$696.00 (Refundable), FARE RULES, Baggage allowances (up to 2 piece(s) - free), BOOK button.

Access: Search Flights -> click “View fares” in search results
Please, contact support to activate this option

As the most of our clients are working with different external hotel suppliers and all the hotel content is loaded and used from external suppliers AS IS during search and booking process. They can encounter with some issues with the content:

- ✓ no main images for some hotels;
- ✓ no hotel types/chains/classifications for most hotels.

Now we have added the ability to edit the external hotel content and have the ability to add images, hotel types, hotel classifications and chains to the external hotel content and then it will be used during search and booking process and saved correctly in the reservations.

The screenshot displays the Adair Arms Hotel listing and its management interface. The listing shows a photo of the hotel interior, a 4-star rating, and the type 'Apartments'. The management interface shows fields for Name, Source of description, Type (set to Apartments), and Classification (with a dropdown menu open showing options like Airport, Bay, Beach, etc.).

Access: Products -> Hotels -> All descriptions -> Source of description (supplier name) -> Hotel name
 Please, contact support to activate this option

As the most of our clients are working with different external activities suppliers and all the content is loaded and used from external suppliers AS IS during search and booking process.They can encounter with some issues with the content:

When you search for transfers - now you have ability not only select hotel or airport or station, but also pick-up any location on the map.

The screenshot displays the 'TRANSFERS' section of the Search&Book interface. The navigation bar includes: HOTELS, FLIGHTS, ACTIVITIES, TRANSFERS (selected), CAR RENTAL, TOURS, CRUISES, INSURANCE, and EXTRA SERVICES. The search parameters are: Pick-up: Adolfo Suarez Madrid-Barajas Airport, Madrid, Spain; Drop-off: C. Mayor, 1, Madrid, Spain; Date: 15 Oct 2024 (Tu); Passengers: 1 passenger. A red arrow points to the drop-off location field, which has triggered a map search. A pop-up message reads: 'Please, specify your drop-off location address, it will help to get more precise price for you'. The map shows the area around C. Mayor, 1, Madrid, Spain, with various landmarks and points of interest labeled. A 'CONFIRM' button is visible at the bottom right of the map area.

Access: Search Transfers

If you know IATA code of departure/arrival airport and need transfer from there - now you can search not only by city or airport name, but also by this code.

This will help to avoid mistakes when ordering transfers (with ability to double check that airport corresponds the one to which flight arrives or departs).

The screenshot shows the 'TRANSFERS' section of the Search&Book interface. The navigation bar includes: < HOTELS, FLIGHTS, ACTIVITIES, TRANSFERS (selected), CAR RENTAL, TOURS, CRUISES, and INS. The search area contains a departure location field with 'lhr' entered, an arrival location field with 'Arrival location', and a date field with '17 Oct 2024 (Th)'. A dropdown menu is open under the departure field, showing two suggestions: 'Heathrow Airport, London, United Kingdom (LHR)' and 'Lhr Coliseum B&B, Rome, Italy'. The word 'Resorts' is visible in the bottom right corner of the interface.

Access: Search Transfers

For Transfers bookings if client knows terminal to which he arrives or departs - now it can be specified.

This is optional, so if this information is not available - it can be just skipped.

But for the suppliers who accept terminal information (eg. Intui) - this will be transferred via API.

 **Transfer**

From:  Orly Airport, Paris, France

Flight Number* AA348	Flying from (airport) VIE - Vienna International Airport	Terminal 1	Date*  17/10/2024
-------------------------	---	---------------	---

Access: Search&Book Transfers

When transfer is booked it's often important to provide client information who and when pick-up him from the airport.

Now within GP Travel Enterprise such ability exists!

In cooperation with [Intui.transfers](https://www.intui.transfers) for any booking via this gateway it's possible to receive not only meeting point information, but also Driver phone number and vehicle. This information is usually provided a day before travel and automatically updated in the system.

Access: Transfer bookings

In order to provide some special attention to certain reservations (e.g. for honeymoon or anniversary), or just differentiate leisure and business trips, or group bookings - in Release 10.3 how you can use “Classification” option, and filter by this choice in list of reservations.

The screenshot shows the reservation management interface for reservation #3595. A dropdown menu for 'Classification' is open, showing options: Anniversary, Family, Group (checked), Honeymoon, and Leisure (checked). The 'Group' and 'Leisure' options are highlighted in blue. The interface also shows a 'Destination' field, a 'Lead Guest' field, and a 'Display format' section with icons for list, grid, and table views, and a 'Show commission' checkbox. Below the classification menu, there is a reservation card for a '2-Day Shared Toledo Tour from Madrid With Private Driver & Local Tour Guide El mejor tour'. The card includes a photo of Toledo, Spain, and details such as location, date, car type, and cancellation policy.

Supplier price	Client price	Manual Correction

Access: Reservations

In previous versions of GP Travel Enterprise it was possible to add passenger phone and email during booking or add/edit for quote via information on passengers on the level of the entire reservation or via “Please enter the details”.

At the same time sometimes it is required to be able to edit contact data after a service is confirmed. So in Release 10.3 this capability was also enabled.

Manual modify service

 Athens Airport to Hotel transfer (INDIVIDUAL)

WARNING!!!
Manual correction of reservation DOES NOT synchronize it with suppliers or inventory.
Please be sure that you have agreed about these changes with suppliers and updated remaining allotments manually.

If you support payment on arrival (e.g. directly to hotel) - it can be useful to be able to control, whether you allow your clients to print voucher in advance, or not.

For this purpose you can configure additional option “Default voucher print control” in payment methods, and afterwards your personnel will have ability to allow or not allow client to download voucher.

Default voucher print control:

SUMMARY

Lead Passenger	Mr. Jeremy Kafka	Departure Date	Fri, September 27, 2024
No. of passengers	1	Duration	7 days / 6 nights

Dear Mr. Jeremy Kafka,

We thank you for considering us as your choice of travel agency for your next vacation. We have received your requesting for price quotations. In this regard, we have prepared our price quotation for travel destinations based on your choice.

Please, do not hesitate to email us for any questions or if you may need additional information regarding our travel services.

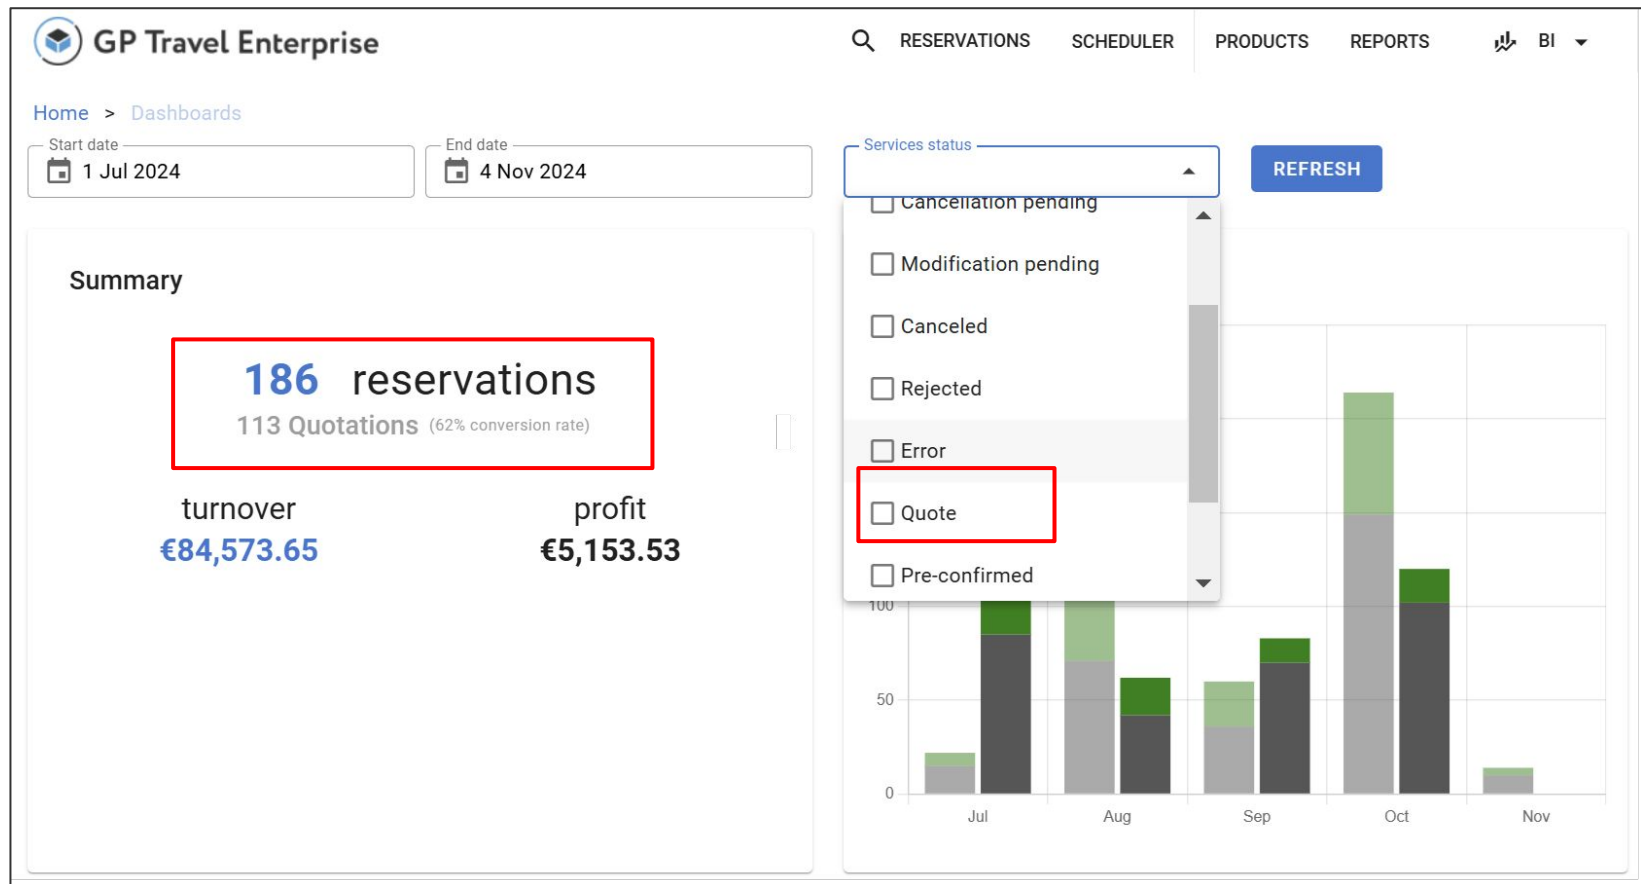

Thank you again for your interest in our services and we hope to serve you very soon.

King regards

Access: Reservation -> generate Quotation

Dashboards and analytics in the system usually makes sense only for Reservations excluding Quotations, and it's also important to see what is conversion rate from quotes to bookings.

Now this information was added to Dashboards, and among parameters we have added possibility to choose different statuses, based on which analytics should be generated.

Access: List of Reservations, Dashboards, Reports

Before the current changes it was possible to cancel transactions (invoices) in the Payment Schedule even if the payment is made already which could cause issues when the transaction is cancelled by mistake and lead to the additional investigation of the initial data to restore the transaction. The same situation could take place with backdating transactions when pay date can be edited to be in past.

To avoid such situations the ability to cancel paid transactions or backdate transactions before a certain date was added to a role 'Director' only.

Access under 'Director' role

There can be different scenarios on applying Agent commission on cancelled services:

- current logic - when a service is cancelled, the Agent commission is totally removed;
- new logic - when a service is cancelled, the commission is recalculated from cancellation fees.

With a new version the configuration on this functionality has been added to the settings of groups of contracts and individual contracts with Agencies / Distributors.

The screenshot shows a configuration window with the following elements:

- Navigation tabs: Products, **Calculation**, Service fees, VAT, Sales terms, Cross-rates, Cancellation fees, Invoices, Grouping, Tags, Additionally.
- Currency: AUD (dropdown)
- Mark-up: 20 (input field) with percentage and list icons.
- Commission: 10 (input field) with percentage, list, and plus icons.
- Perform sales in:
 - Original currencies from suppliers
 - Currency specified in contract
- Round up client prices:
 - Round up client prices
 - round up commission
 - not round up commission
- Apply commission to cancelled service
- Buttons: Save, Cancel

Access:

- Clients >> Agencies / Distributors
- Clients >> Sales settings >> Groups of contracts

Finally, we continue moving on new UI configuration of Own products, and almost finished this.

Now you can create, view and edit all types of products with which you work and fill in their descriptions, prices and availability via new modern front end - so most of your day-to-day actions you can do there. Note, that some features still remain in administrative panel, and we're going to finalize this in next release.

3. API Changes

Added new sections to the REST API:

- ✓ Tour
- ✓ PackageContracts
- ✓ DynamicPackageContracts

New API methods are added:

Accommodations:

- ✓ **GET PUT POST** /ownHotelInfo- get / update / create general info about hotel
- ✓ **PATCH** /ownHotelInfo/{hotelId} - update hotel status
- ✓ **GET PUT** /hotelDescription//{hotelId}/general - get / update general description about hotel
- ✓ **GET PUT** /hotelDescription//{hotelId}/details - get / update detailed info about hotel
- ✓ **GET PUT** /hotelDescription//{hotelId}/amenities - get / update hotel amenities
- ✓ **GET PUT** /hotelDescription/{hotelId}/location - get / update hotel location
- ✓ **GET PUT** /hotelDescription/{hotelId}/checkin - get / update hotel check-in/check-out
- ✓ **GET PUT POST** /hotelDescription/{hotelId}/roomType - get / update / create hotel room type
- ✓ **GET PUT POST** /hotelDescription/{hotelId}/mealType - get / update / create hotel meal type
- ✓ **GET PUT POST** /hotelDescription/{hotelId}/images - get / update / create hotel images
- ✓ **GET** /hotelDescriptionDictionaryInfo - obtain information about available hotel Descriptions
- ✓ **GET** /hotelClassificationDictionaryInfo - obtain information about available hotel Classifications
- ✓ **GET** /hotelTypesDictionaryInfo - obtain information about available hotel Types
- ✓ **GET** /hotelServiceDictionaryInfo - obtain information about available hotel Services
- ✓ **GET** /hotelCategoryDictionaryInfo - obtain information about available hotel Categories
- ✓ **GET** /hotelChainDictionaryInfo - obtain information about available hotel Chain

TransferContracts:

- ✓ **GET** /ownTransferServiceCategories - obtain information about own Transfer service categories
- ✓ **POST** /ownTransferServiceCategories - create own Transfer service category
- ✓ **PUT** /ownTransferServiceCategories - update own Transfer service category

Activities:

- ✓ **GET** /excursions - get list of external excursions
- ✓ **GET** /excursionDescriptionTypes - get list of excursion description types
- ✓ **GET** /excursionCategories - get list of excursion categories
- ✓ **PUT** /prepareActivityBook/{basketKey} - put prepared offer to the basket

ExcursionContracts:

- ✓ **GET** /ownExcursionServiceCategories - obtain information about own Excursion service categories
- ✓ **POST** /ownExcursionServiceCategories - create own Excursion service category
- ✓ **PUT** /ownExcursionServiceCategories - update own Excursion service category

Tour:

- ✓ **GET** /searchTours - search Tour offers
- ✓ **GET** /tourInfo - get tour info
- ✓ **GET** /tourAdditionalOptions - get tour additional options
- ✓ **POST** /prepareBookTour - prepare tour book (the first step of the booking process)
- ✓ **PUT** /prepareBookTour/{basketKey} - put prepared offer to the basket

PackageContracts:

- ✓ **DELETE** /ownPackageContracts/{packageId}/itinerary/{itineraryId} - delete package itinerary
- ✓ **DELETE** /ownPackageContracts/{packageId}/availability/{availabilityId} - delete package availability
- ✓ **GET** /ownPackageContracts/{packageId}/itinerary/ - get package itinerary
- ✓ **GET** /ownPackageContracts/{packageId}/itineraryDay/ - get package itinerary days
- ✓ **GET** /ownPackageContracts/{packageId}/availability/ - get package availability
- ✓ **GET** /ownPackageContracts - get own ComplexTour contracts
- ✓ **PATCH** /ownPackageContracts/{id} - activate/deactivate own contract
- ✓ **POST** /ownPackageContracts/{packageId}/itinerary/ - save package itinerary.
- ✓ **POST** /ownPackageContracts/{packageId}/availability/ - save package availability
- ✓ **POST** /ownPackageContracts - create own ComplexTour contract
- ✓ **PUT** /ownPackageContracts/{packageId}/itinerary/{itineraryId} - update package itinerary
- ✓ **PUT** /ownPackageContracts/{packageId}/itineraryDay/ - update package availability
- ✓ **PUT** /ownPackageContracts/{packageId}/availability/{availabilityId} - update package availability
- ✓ **PUT** /ownPackageContracts - update own ComplexTour contract

DynamicPackageContracts:

- ✓ **GET** /ownDynamicPackageContracts - get own DynamicPackage contracts
- ✓ **PATCH** /ownDynamicPackageContracts/{id} - patch own contract
- ✓ **POST** /ownDynamicPackageContracts - create own DynamicPackage contract
- ✓ **PUT** /ownDynamicPackageContracts - update own DynamicPackage contract

OwnProducts:

- ✓ **GET** /priceListCodes/{productName} - get price type for own product service
- ✓ **GET PUT POST** /subAllotments - get / update / create ownProduct SubAllotments

Search:

- ✓ **GET** /contentProviders - obtain information about available suppliers/content providers
- ✓ **POST** /copyHotelInfo/{hotelId} - create a copy of the hotel

Schedulers:

- ✓ **PUT** /seatsByProcessId - update scheduler groups seats
- ✓ **PUT** /kpi/{kpId} - update KPI

Documents:

- ✓ **GET** /seatMap - get seat map
- ✓ **POST** /seatMap - create seat map
- ✓ **PUT** /seatMap/{id} - update seat map

BusinessIntelligence:

- ✓ **GET** /kpis - get KPIs
- ✓ **GET** /kpiStatistics/{kpId} - get KPI statistics
- ✓ **PATCH** /kpi/{kpId} - update status KPI
- ✓ **POST** /kpi - create KPI

New parameters are added to the existing API methods:

OwnProducts:

- ✓ **GET PUT POST** /ownProductPriceLists: new parameters “extraPrices” and “extraNightCount” are added
- ✓ **GET PUT** /availability: new parameter “subAllotmentId” is added

[Product]Contracts:

- ✓ **GET PUT POST** /own[product]Contracts: new parameter “stage” is added

Accommodations:

- ✓ **GET** /hotels:
 - added new parameters “namePattern”, “ratingFrom”, “ratingTo”, “groupId” to the request
 - added new parameters “giataCode”, “rating”, “haveHotelsInGroup”, “count” to the response
- ✓ **POST PUT** /hotelInfo:
 - deleted parameters “descriptionType”, “descriptionLocalizable”
 - added new parameters “phone2”, “phone3”, “email2”, “email3”, “groupNumber”, “giataId”, “villa”, “apiHotelDetailedDescription”
 - renamed parameters: categoryId → additionalCategoryId, hotelNameLocalizable → hotelName, hotelAddressLocalizable → addressLine, hotelMealTypes → mealTypes, internalNoteLocalizable → internalNote

Activities:

- ✓ **GET** /searchActivities:
 - added new parameter “locationPointId” to the request
 - added array “venue” to the response
- ✓ **GET** /activityInfo: added array “venue” to the response

Orders:

- ✓ **GET /orders:**
 - added new parameters "modifyManualSeat" and "seatsVisibleForClient" to the response
 - added new parameter "serviceSources" to the request
- ✓ **GET /downloadOrders:** added new parameters "supplierSummaryQuotations", "clientSummaryQuotations", "supplierSummaryInCurrency", "clientSummaryInCurrency", "supplierSummaryQuotationsInCurrency", "clientSummaryQuotationsInCurrency"
- ✓ **PUT POST /orderServices** - added new parameters "modifyManualSeat", "seatsVisibleForClient", "email", "phone" and array "travelers"
- ✓ **POST /manualModification** - added new parameters "modifyManualSeat", "seatsVisibleForClient", "email", "phone", "serviceName", "activity.activityServiceName", "transfer.transport" and array "travelers"

Schedulers:

- ✓ **GET /schedulerGroupDetails** - added new parameter "orderIdSeats" to the request

CRMPerson:

- ✓ **GET /privateClients** - added new parameter "phone" to the request

Contracts:

- ✓ **GET /salesSettings:** added new parameter "applyCommissionToCancelledService" (true/false) to the response

Schedulers:

- ✓ **GET /schedulerGroupDetails:** added new parameters "requestedServiceName" and "vehicleTypeName" to the response

Dashboards:

- ✓ **GET /dashboards:** added new parameters "serviceStatuses" and "topWidgetType" to the request

Note: see the details on API changes here: <https://gp-team.atlassian.net/wiki/x/FYAWmQ>

Dear clients!

We hope that you will find these enhancements useful.

Send your questions, feedback and suggestions to our e-mail address gpte@software.travel with “Release 10.3” in the subject line.

Thank You For Attention!
