1. NEW MODULES

FLIGHTS: GDS TERMINAL

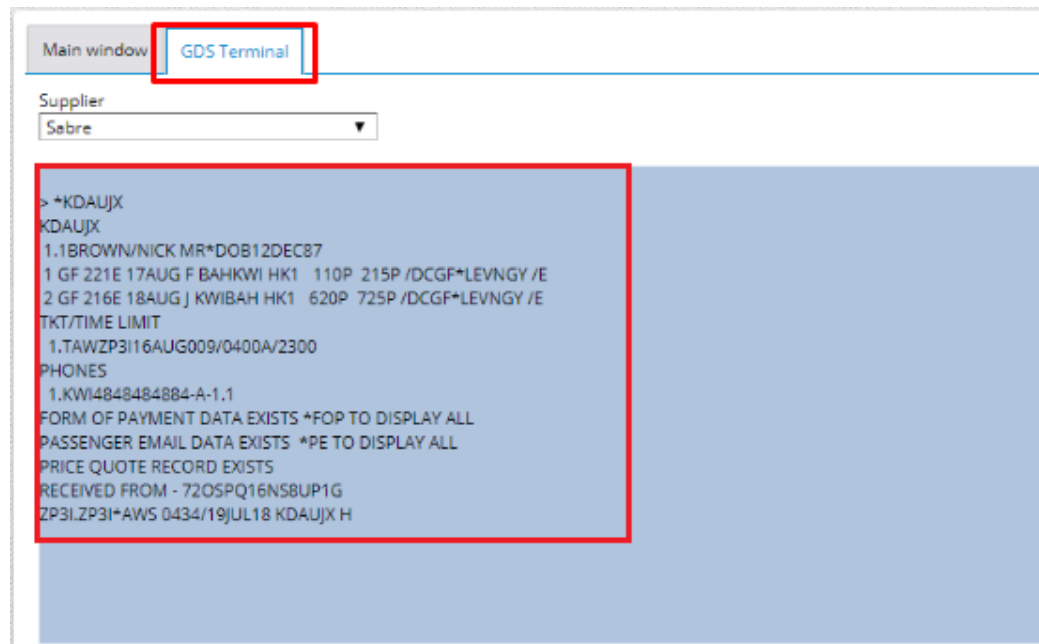

From Release 7.2 we provide you a possibility to use a GDS terminal emulator integrated into the system. At the moment such function is available only for Sabre supplier.

Via this emulator it is possible to run commands directly to GDS for processing of complex reservations, for refunds, exchanges and more.

Please, note that it is not usual way to communicate with GDS via API, so if you're interested in this module, first of all you will need to request access from GDS to such functionality.

Access:

- ✓ GDS Terminal

2. ENHANCEMENTS IN EXISTING MODULES

HOTELS: DAILY RATES

For those, who offer their clients rooms, which price changes within the day time, in new Release 7.2, an ability to set daily rates was added to self operated hotels.

It takes just a few minutes to specify all the necessary information for configuring daily rates. But significantly broadens the range of your offers.

HOTELS: SURCHARGES

Additionally, within the new release together with daily rates (that are usually set up per room for default quantity of guests) you can set up some additional surcharges to base prices on extra beds/sharing places or meal types for selfoperated hotels. When you create a price list for surcharges and add it to active tariff, surcharges will be included in client's price.

Right now surcharges are compatible only with daily rates.
