CHANNEL MANAGER YIELD PLANET: CLOSING/OPENING OF ROOMS ON HOTELS

As sometimes there is need to close room(s) for sales in some hotels this functionality was added to connection with Yield Planet to send them this information so that they could transfer it further to the partners that are connected to the corresponding hotels.

Access:

- ✓ Inventory: Selfoperated hotels >> Hotels >> Certain hotel >> Availability >> Blockout
- ✓ Yield Planet API

B2B: ADDING/DELETING EARLY CHECK-IN / LATE CHECK-OUT IN RESERVATIONS (VIA MANUAL MODIFICATION)

According to business processes of working with bookings sometimes there is a need to add to the existing reservation or remove from it early check-in and/or late check-out services for hotels added to the system by direct contracts in Inventory.

In this regard the corresponding functionality was implemented that will allow to perform such actions.

When adding extra services on early check-in/late check-out to an existing reservation it is important to correct total Netto price on hotel as well to include these extra charges to total price.

GATEWAYS: CHECK STATUS OF PAYMENT VIA WEBPAY

To check the status of payment on the side of the Webpay online payment system, and use this functionality to automatically complete the reservation of services in case when the customer did not return to the site from the payment page of Webpay, a corresponding method of integration with Webpay through their API was implemented within Release 7.3.

Access:

- ✓ Finance >> Online payments
- ✓ Webpay API

Check payment status ✕

B2C: CHECK BOX “AGREEMENT WITH PROCESSING MY PERSONAL DATA”

The purpose of LAW ON PROTECTION OF PERSONAL DATA is to protect fundamental rights and freedoms of people, particularly the right to privacy, with respect to processing of personal data and to set forth obligations, principles and procedures which shall be binding upon natural or legal persons who process personal data. These rules are actualized in new release 7.3. That's why corresponding check boxes were added to register and booking form.

Access:

- ✓ B2C website

API: INFORMATION ON NUMBER OF GUESTS REQUIRED DURING BOOKING

Usually each hotel supplier has its own rules for bookings when general information like name, citizenship or any other may be required for 1 or all guests during booking (sometimes it even can be mixed variant with any of these both options). In this case to make booking process via API more flexible and sometimes even quicker not requesting information on all the guests within Release 7.3 a new parameter *guestsInformationRequiredType* was added with possible values:

- ✓ ONLY_TOURLEAD - allow booking with the tour leader only
- ✓ MIXED - tour leader information is enough but you may send other guests information
- ✓ ALL - all guests information is required

Access:

- ✓ API

GET /searchAccommodation Search accommodation
