IATA NEW DISTRIBUTION CAPABILITY (NDC)

We are happy to announce you that our company is NDC Standard capable now which means possibility of flexible connection to airlines.

NDC (New Distribution Capability) is a travel industry-supported program launched by IATA for the development and market adoption of a new, XML-based data transmission standard.

The NDC Standard is open to any third party, intermediary, IT provider or non-IATA member, to implement and use.

The NDC Standard enables the travel industry to transform the way air products are retailed to corporations, leisure and business travelers, by addressing the industry's current distribution limitations:

- ✓ Product differentiation and time-to-market
- ✓ Access to full and rich air content
- ✓ Transparent shopping experience

See more at <https://www.iata.org/whatwedo/airline-distribution/ndc>

Note: in order to connect this module, please contact GP technical support. Each airline can have its own specifics which may require additional implementation. All the details will be clarified with you in case of connecting a new standard depending on required airlines.

Your opinion matters

Dear clients!

We hope that these enhancements will be useful.

Send your questions, feedback and suggestions to our e-mail address support@software.travel with “Release 7.6” in the subject line.

Thank you for attention!
