

GP Travel Enterprise Release 8.2

Presentation

June 12, 2020

Dear clients and partners!

We are happy to announce Release 8.2 of GP Travel Enterprise that introduces a new look&feel for search&book for flights products and CMS integration. Additionally some enhancements in existing modules in B2B were done.

For scheduling the delivery dates please contact our support team.

New Modules

New version of the website:

- ✓ New look&feel for search&book for flights product
- ✓ CMS

Enhancements In Existing Modules

B2C:

- ✓ New version of the website: Search form (additional fields for hotel and transfer products)

Back-Office (BO):

- ✓ Automapping
- ✓ Self-operated products: Discounts configuration
- ✓ Scheduler: Automatic creation of a group after date change
- ✓ Scheduler: Status 'Confirmed' after manual correction
- ✓ List of reservations: New field 'Due to pay'
- ✓ Invoices: With automatic invoicing, cancel previous unpaid invoices
- ✓ Inventory Reports: Price list – Hotels
- ✓ Statement of account: New filters

We integrated Content Management System in the new version of the website.

CMS enables you:

- to load static pages;
- to configure customization (logo, popular destinations, etc.).

The screenshot displays the GP Travel Enterprise CMS interface. On the left is a dark sidebar with navigation options: COLLECTION TYPES (CustomTranslations, InfoPages, PopularDestinations, Users), SINGLE TYPES (HomePageSettings, LayoutSettings), PLUGINS (Content-Types Builder, Media Library, Roles & Permissions), and GENERAL (Marketplace, Plugins, Settings). The main content area is split into two panels. The top panel, titled 'PopularDestination', shows a table with 5 entries. The bottom panel, titled 'Media Library', shows 6 assets. A red box highlights the 'CMS' option in the top right dropdown menu.

PopularDestination
5 entries found

2. Enhancements in Existing Modules

New version of the website: Search form

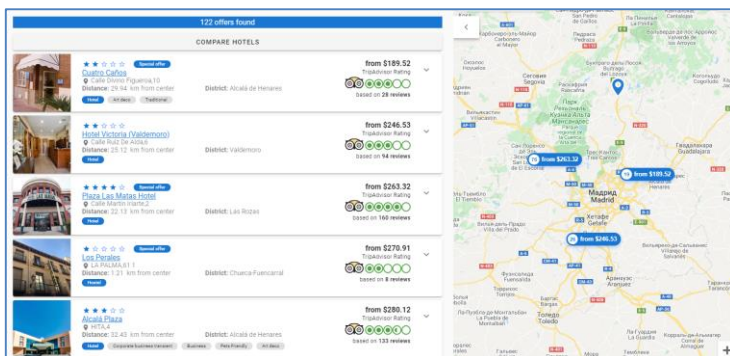

The search form for hotels and transfers apart from main search fields now contains additional fields (Extra Options).

The image displays two screenshots of the GP Travel Enterprise website's search interface. The top screenshot shows the hotel search form, which includes fields for Destination, dates (13 Jun 2020 (Sa) - 19 Jun 2020 (Fr)), and the number of guests (1 room 2 guests). Below these are 'Extra Options' including a Promo Code field, Star rating, Meal Type, and Citizenship. The bottom screenshot shows the transfer search form, which includes fields for Departure location, Arrival location, date (13 Jun 2020 (Sa)), and the number of tourists (1 tourist). It also features 'Extra Options' with checkboxes for Private Transfer and Shared Transfer. Both forms have a SEARCH button.

Note: in order to connect this module, please contact GP technical support or your account manager

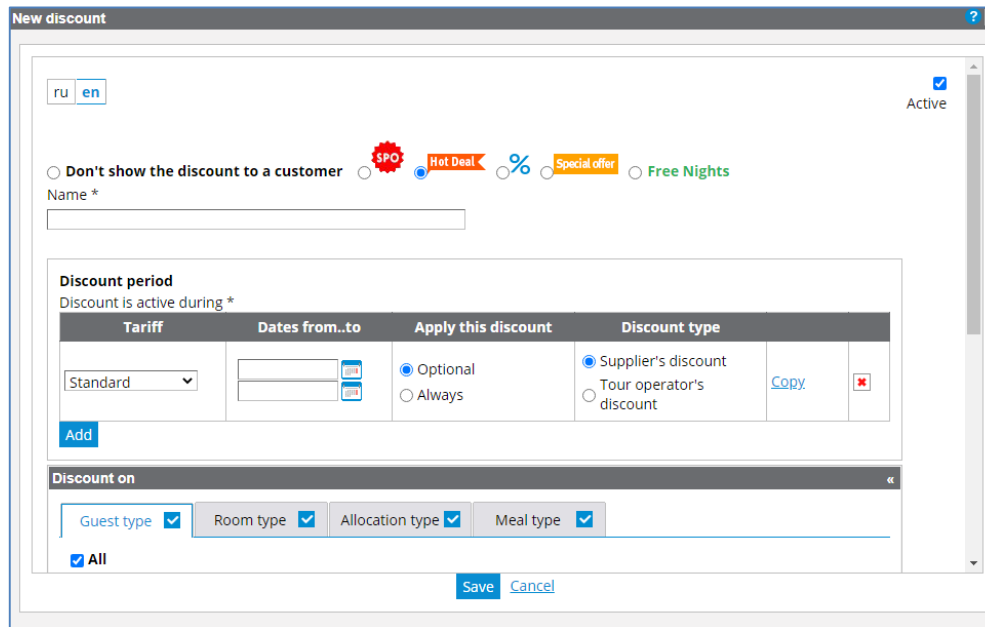

We continue working on automapping of hotels from multiple suppliers. Please, note that this mapping is not so accurate as manual mapping from GIATA, but gives you possibility to have ~80% of your properties mapped fast and easy. Right now the following countries are available:

Abkhazia.AB	Cayman Islands.KY	Georgia.GE	Liechtenstein.LI	Norway.NO	South Korea.KR

You can easily configure discounts for self-operated products. You can bind discounts to tariffs not only from tariffs, but also from discounts settings, where it's possible to bind discounts to one or more tariffs.

The screenshot shows the 'New discount' window with the following fields and options:

- Language: ru | en
- Active: ☒
- Discount type: ☐ Don't show the discount to a customer, ☒ SPQ, ☐ Hot Deal, ☐ %, ☐ Special offer, ☐ Free Nights
- Name: *
- Discount period: Discount is active during *
- Table with columns: Tariff, Dates from..to, Apply this discount, Discount type
- Table content: Standard, [calendar icon], Optional, Supplier's discount, Copy, [X icon]
- Table content: [Add button]
- Discount on: Guest type ☒, Room type ☒, Allocation type ☒, Meal type ☒
- Buttons: Save, Cancel

Access:

- ✓ Self-operated products (certain product) >> Prices >> Discounts

Scheduler: Automatic creation of a group after date change

Starting from Release 8.2, after changing the date in one of several reservations combined in one group, the new group is automatically created in the scheduler. Earlier the users had to do this shift manually.

✓ **Self-operated products >> Scheduler**

Scheduler: Status 'Confirmed' after manual correction

After manual correction with changing the status of the reservation from '**Confirmation pending**' to '**Confirmed**', the reservation automatically appears in the scheduler.

The image shows two overlapping software windows. The top window is titled "Travel service repair" and contains a form for editing a reservation. The "Status" dropdown is set to "Confirmed" and is highlighted with a red box. The bottom window is titled "Scheduler" and displays a list of reservations. A dropdown menu is open over the "Scheduler" button in the top window, showing a list of product types including "Hotels", "Charters", "Transfers", "Cars", "Excursions", "Events", "Tours", "Visa", "Insurance", "Extra services", "Cruises", and "Complex Tours and Packages". The "Scheduler" window shows a search filter for "Date" from 10.06.2020 to 10.07.2020. Below the search bar, there is a table of reservations.

Group number	Date	Program	Service	Program type	Tourists #	Guide	Driver	Status

Summary of reservations

We added the option **‘With automatic invoicing, cancel previous unpaid invoices and issue a relevant invoice for all services’**. It refers to the situation when automatic invoicing is activated. After choosing this option, previous unpaid invoices are cancelled, and a relevant invoice for all services is issued.

This option is available for all payment methods.
