# 1. New Modules

A new supplier of **excursions** has been added to our Travel Suppliers List. **Abbey** offers a wide selection of activities in the UK and Ireland, and also provides an exciting range of programs by Moloney & Kelly.

**Note:** in order to connect the new module, please contact GP support or your Customer Success Manager

For distribution with **RateHawk**, we've added an integration with Emerging Travel Group OpenAPI – a universal protocol for distributor for a real time connection to the hotel provider's system.

This API enables to:

- Obtain static information about hotels.
- Search available rates by a list of hotels or region.
- Book rates, check bookings' statuses and cancel bookings.

**Note:** in order to connect the new module, please contact GP support or your Customer Success Manager

To allow users to leave reviews about services, we have developed a new **Feedback & Reviews** module. It's now possible to rate a hotel directly from reservations:

The screenshot shows a reservation for **Park Hotel Madrid** with the following details:

- Lead Guest:** Mr. **John Anderson**, test@gpsolutions.com, Date of Birth: 1979-06-25
- Reservation:** 2081, Status: **Completed**
- Booking date:** 27 Dec 2023 (We)
- Client:** Mr John Anderson, **Manager:** Mr Gp Director

The feedback form titled "How was your stay in Park Hotel Madrid?" includes:

- What would you suggest to improve?:** A text area containing: "Complimentary coffee or coffee maker in room."

Buttons for **SUBMIT FEEDBACK** and **CANCEL** are at the bottom of the form.

## **2. New Capabilities of the Website**

To make it possible to search and book for a private client, we have added a new “Private client” radio-button to the “Select agent/client” form. After the user selects a private client from the drop-down menu, the search is made taking into account all the settings and discounts that relate to the chosen client.

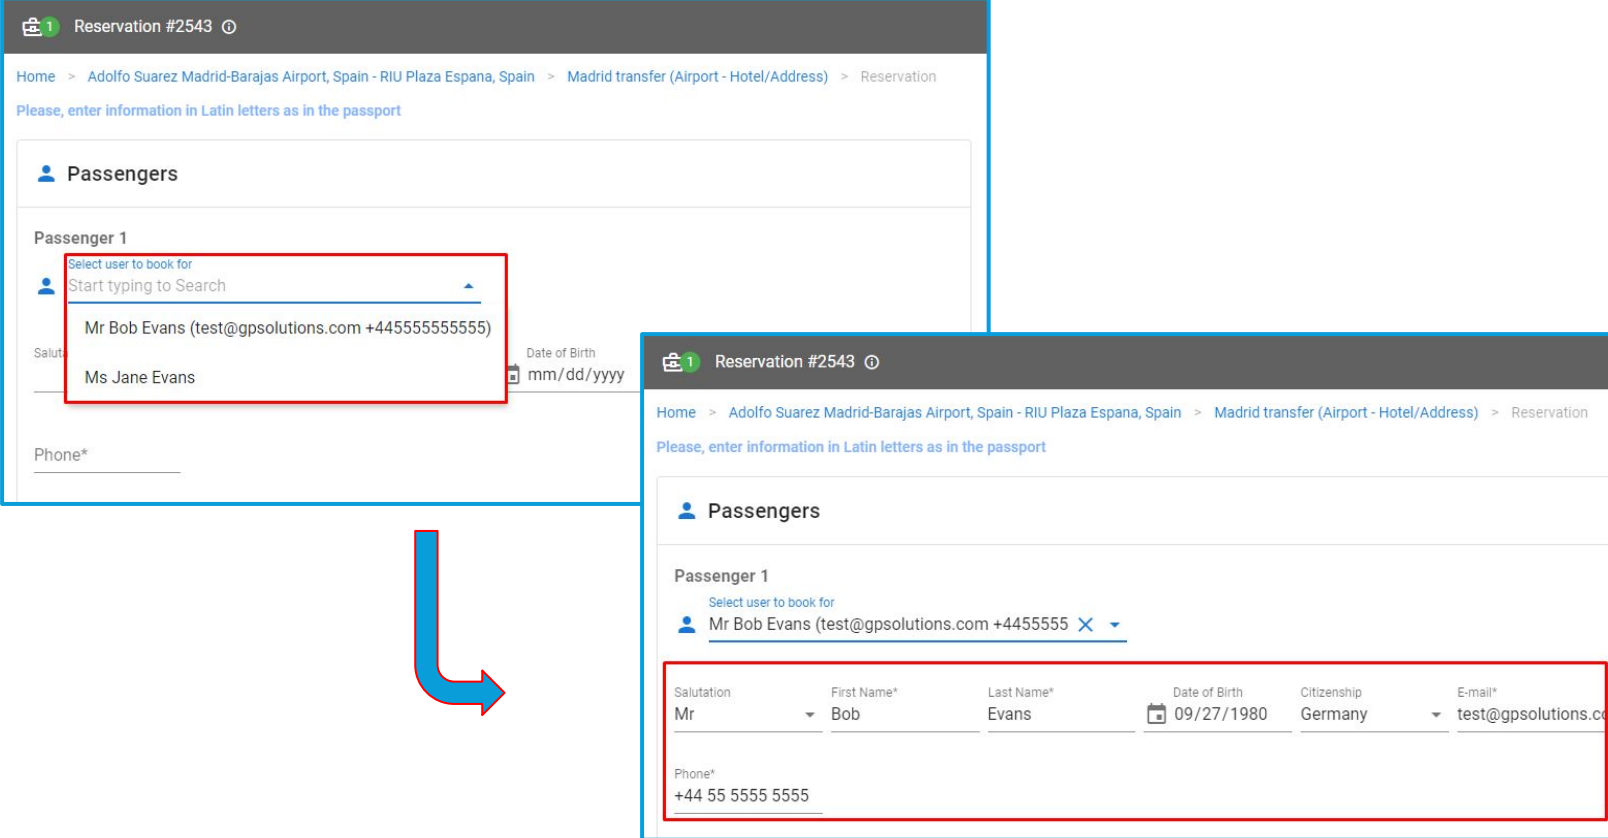

**Access:**

Main page >> Log in as B2B user >> Select agent / client

**Note:** in order to connect new version of website, please contact GP support or your Customer Success Manager

We've implemented the possibility to choose travelers from a drop-down list on the booking page, when adding more services to an existing reservation:

The image shows two screenshots of a web application interface for booking a reservation. The top screenshot shows the 'Passengers' section with a dropdown menu open for 'Passenger 1'. The dropdown list contains two options: 'Mr Bob Evans (test@gpsolutions.com +44555555555)' and 'Ms Jane Evans'. A red box highlights the dropdown menu. The bottom screenshot shows the same page after the selection, with 'Mr Bob Evans (test@gpsolutions.com +4455555)' selected. A red box highlights the selected passenger's details, which are displayed in a table format:

Salutation	First Name*	Last Name*	Date of Birth	Citizenship	E-mail*
Mr	Bob	Evans	09/27/1980	Germany	test@gpsolutions.c

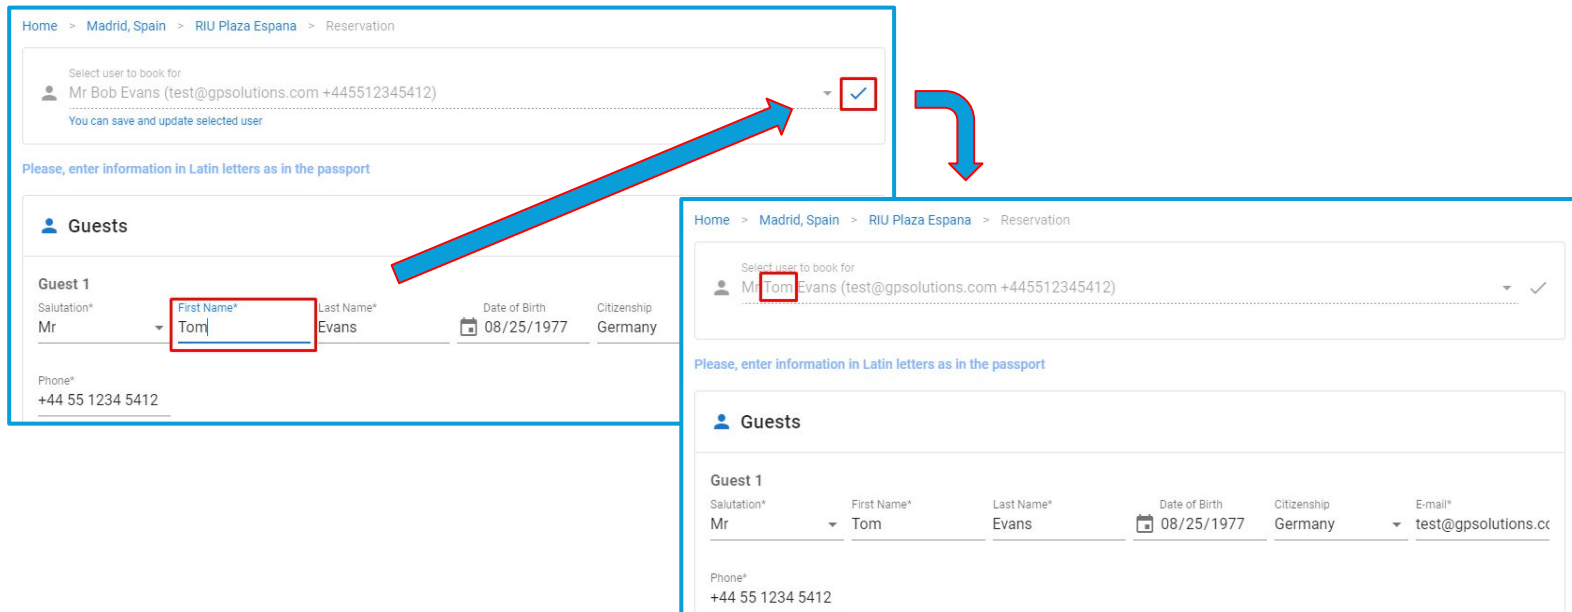

Below the table, the phone number '+44 55 5555 5555' is visible. A large blue arrow points from the dropdown menu in the top screenshot to the selected passenger details in the bottom screenshot.

## Access:

Main page >> Log in as B2B user >> Reservation >> Add service >> [Product] search >> Booking page

**Note:** in order to connect new version of website, please contact GP support or your Customer Success Manager

We have extended the logic of updating details of a client and Guest 1 on the booking page. When a client is selected in the “Search and book for” or “Select user to book for” drop-down, their details are automatically copied to Guest 1. If then any changes are made to the details of Guest 1, a tick becomes active next to the client’s field. If the user clicks on the tick, the changes made for Guest 1 will also apply to the client:

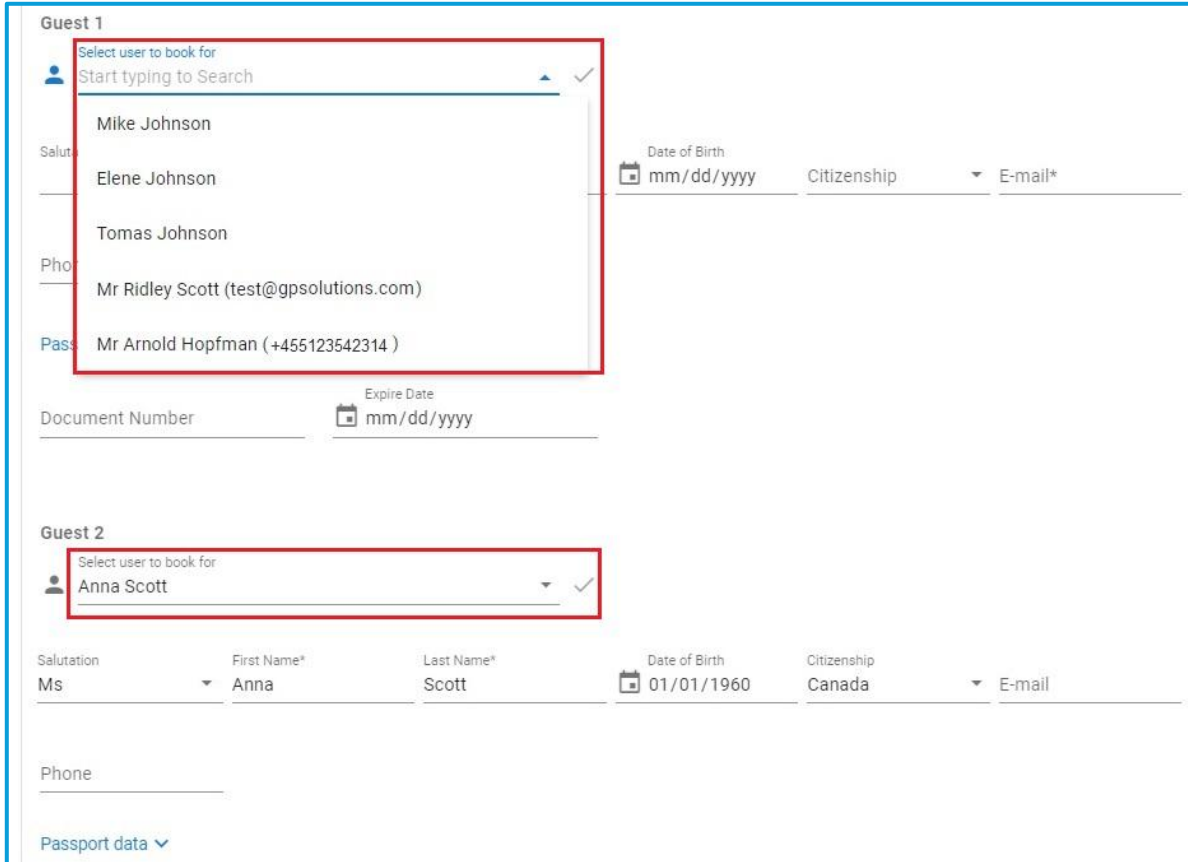

If the user doesn't click on the tick, the changes are only saved for Guest 1.

When adding services to an existing reservation of a Corporate Client, there is now a possibility to select each traveler from already defined users of the Corporate Client.

The screenshot displays a booking form with two guest sections. Guest 1's 'Select user to book for' dropdown is open, showing a list of users: Mike Johnson, Elene Johnson, Tomas Johnson, Mr Ridley Scott (test@gpsolutions.com), and Mr Arnold Hopfman (+455123542314). Guest 2's dropdown is also open, showing 'Anna Scott'. The form includes fields for Date of Birth, Citizenship, E-mail, Document Number, and Expire Date.

To make the flight search process even more convenient, we have implemented airport filters on the search results page:

The screenshot displays a flight search results page with the following components:

- Filters (Left Panel):** A sidebar with a red border containing filters for "Departure / Arrival airports", "Transfer airport", and "Airlines". Under "Departure / Arrival airports", "Only Airport (ORY)" is selected. Under "Transfer airport", "Zurich Airport (ZRH)" is selected. Under "Airlines", "Air Europa" is selected.
- Search Results (Center):** A table showing flight options. The top section is titled "23 out of 105 offers match your filters" and "BEST PRICES FOR NEAREST DATES". It lists three categories: "Optimal" (\$282.00, 5h 45m), "Fastest" (\$332.40, 2h 25m), and "Cheapest" (\$259.20, 13h 55m). Below this, two flight options are shown:

# Cruises, Activities and Multi-day Tours: Sort Search Results by Date

To make it possible to sort search results by date, we've added a new option "Date" to the list of sorting results of Cruise, Activity and Multi-day Tours. When it is selected, the results are sorted from the nearest to the furthest date. When then going to the selected Cruise / Activity / Multi-day Tour info page, the sorting remains as selected on the search results:

The image displays two screenshots of a travel website interface, illustrating the sorting of search results by date. A red arrow points from the search results page to the detailed cruise information page.

**Left Screenshot (Search Results):**

- Location: Pisa, Italy

We have also implemented a new option “Date” for grouping of Cruise, Activity and Multi-day Tours search results. When it is selected, the results are grouped by Date from the nearest to the furthest date. If there are several offers for the same date, the search results are sorted by price from low to high in each Date group. When then going to the selected Cruise / Activity / Multi-day Tour info page, the grouping remains as selected on the search results.

The screenshot shows a search results page for 'Pisa, Italy' with the following details:

- Destination: Pisa, Italy
- Travel Dates: 15 May 2024 (We) - 23 May 2024 (Th)
- Guests: 1 guest
- Sort: Price (low to high)
- Group By: Date (highlighted in red)
- Meal Type: (highlighted in red)
- Filter by cruise name: (empty)
- Cabin type name: DELUXE VERANDA STATEROOM (3), VERANDA STATEROOM (3)
- Duration: 8

The search results are grouped by date:

- 20 May 2024 (Mo) from \$2,420.00
- 17 May 2024 (Fr) from \$2,970.00
- 15 May 2024 (We) from \$3,190.00

Each date group contains two offers:

For offline services, we have extended the logic to add a number of travellers automatically based on the value entered in the “Quantity of pax” field.

If there are no travellers in a booking yet, they are added depending on the selected number of pax:

The screenshot shows the 'Add offline service' form. The 'Quantity of pax' field is set to 3. A red box highlights this field, and a blue arrow points to the traveler details section. The traveler details section is also highlighted with a red box and contains three rows of fields for Salutation, First Name, Last Name, Date of Birth, Traveler Type, and Citizenship. The 'Specify all travelers' radio button is selected.

If there are travellers in a booking from other services, they are added below with all the details based on the selected quantity of pax:

The screenshot shows the 'Add offline service' form. The 'Quantity of pax' field is set to 2. A red box highlights this field, and a blue arrow points to the traveler details section. **Supplier price section:**

- Currency: EUR (highlighted with a red box)
- Amount\*: EUR 350
- Commission %: %

We've implemented the possibility to view and amend the Booking Date of the whole reservation. Booking Date keeps the history of when Quotation becomes Booking. By default it's set automatically for the 1st service booked.

The screenshot displays a reservation management interface. On the left, guest details for Jack Brandon and Angela Brandon are shown. The central section features a hotel listing for 'Basic Hotel' with a 'Confirmed' status, including a room type 'TWIN STANDARD ROOM', dates from 10 Jan 2024 to 15 Jan 2024, and prices in both Euro and Pound. On the right, reservation details for reservation 2512 are shown, with the current booking date set to 16 Dec 2023. A calendar pop-up is open, showing the date 16 Dec 2023 selected. A red box highlights the 'Booking date' field in the reservation details, and a red arrow points from this field to the calendar pop-up.

For more effective management of reservations and documentation, we have extended the existing check-box “Show cancelled services without fee” to be applied for rejected services as well, and renamed it to “Show rejected/cancelled services without fee”. Now when the check-box is unticked, the system hides services in the “Rejected” status too

- Rejected services can be hidden on the “Reservations” List

The image displays two screenshots of the Reservations list interface, illustrating the effect of the 'Show rejected/cancelled services without fee' checkbox.

**Top Screenshot (Checkbox Checked):** The checkbox 'Show rejected/cancelled services without fee' is checked. The table shows three reservation entries. The 'Rejected' status is visible in the status column for the third entry.

The screenshot shows the 'Reservations' page with a summary bar indicating 'Reservations: 1,089' and 'Services: 1,290'. The table below shows a single reservation with the following details:
